TABLE OF CONTENTS

Chapter 1	General introduction and outline of this thesis	9
Chapter 2	The contribution of tissue-grouped BMI-associated gene sets to cardiometabolic disease risk: a Mendelian randomization study	19
Chapter 3	Abdominal adiposity in adolescence and early changes in atherogenic metabolites into young adulthood	39
Chapter 4	The relation between adult weight gain, adipocyte volume and the metabolic profile at middle age	57
Chapter 5	Adult weight change in relation to visceral fat and liver fat at middle age: The Netherlands Epidemiology of Obesity study	77
Chapter 6	The association between adult weight gain and insulin resistance at middle age: mediation by visceral fat and liver fat	97
Chapter 7	Preventive factors and underlying pathways of incident cardiometabolic disease in obesity	117
Chapter 8	General discussion and summary of the main results	143
Appendices	Dutch summary – Nederlandse samenvatting Acknowledgements Curriculum vitae Portfolio List of publications	159
