Improving Diagnostic, Prognostic and Predictive Biomarkers in Colorectal Cancer  
The role of Proteomics and Stromatogenesis

Proefschrift

ter verkrijging van  
de graad van doctor aan de Universiteit Leiden,  
op gezag van rector magnificus prof.dr.ir. H. Bijl,  
volgens besluit van het college van promoties  
te verdedigen op donderdag 2 juni klokke 15:00 uur

door

Anouck Huijbers  
geboren te Alphen aan den Rijn

## **PROMOTIECOMMISSIE**

Promotor: Prof. Dr. R.A.E.M. Tollenaar

Co-Promotor: Dr. W.E. Mesker

Leden Promotiecommissie:

Prof. Dr. M.E. van Leerdam

Prof. dr. ir. J.J.M. van der Hoeven (Radboud UMC)

Dr. K.C.M.J. Peeters

Dr. V. Terpstra (Haaglanden MC)

## TABLE OF CONTENTS

|                                                                                                                                                                                |     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Chapter 1 - Introduction and Outline                                                                                                                                           | 7   |
| Chapter 2 - Proteomic serum biomarkers and their potential application in cancer screening programs                                                                            | 17  |
| Chapter 3 - Case-controlled identification of colorectal cancer based on proteomic profiles and the potential for screening                                                    | 41  |
| Chapter 4 - The proportion of tumor-stroma as a strong prognosticator for stage II and III colon cancer patients; validation in the VICTOR trial.                              | 73  |
| Chapter 5 - The value of additional bevacizumab in patients with high-risk stroma-high colon cancer. A study within the QUASAR2 trial, an open-label randomized phase 3 trial. | 73  |
| Chapter 6 - Unravelling the tumor associated stroma in colon cancer patients using laser capture microdissection and reverse phase protein microarray.                         | 85  |
| Chapter 7 - General Discussion and Future Perspectives                                                                                                                         | 101 |
| Chapter 8                                                                                                                                                                      | 117 |
| Nederlandse Samenvatting                                                                                                                                                       | 119 |
