# Small regulatory RNAs in Vascular Remodeling and Atherosclerosis

Proefschrift

ter verkrijging van  
de graad van doctor aan de Universiteit Leiden,  
op gezag van rector magnificus prof.dr.ir. H. Bijl,  
volgens besluit van het college voor promoties  
te verdedigen op donderdag 9 juni 2022  
klokke 15.00 uur

door

Eva van Ingen

geboren te Utrecht  
in 1992

Promotor: Prof. dr. P.H.A. Quax

Copromotor: Dr. A.Y. Nossent

Leden promotiecommissie: Prof. dr. M.J.T.H. Goumans  
Prof. dr. P.C.N. Rensen  
Prof. dr. R.A. Boon (Amsterdam UMC)  
Dr. I. Bot (Leiden University)

The research described in this thesis was supported by a grant from the Rembrandt Institute of Cardiovascular Science (2016). Financial support by the Dutch Heart Foundation for the publication of this thesis is gratefully acknowledged.

# Table of contents

<b>Chapter 1</b>	General introduction	7
<b>Chapter 2</b>	Antisense oligonucleotide inhibition of microRNA-494 halts atherosclerotic plaque progression and promotes plaque stabilization	29
<b>Chapter 3</b>	Inhibition of microRNA-494-3p activates Wnt signaling and reduces proinflammatory macrophage polarization in atherosclerosis	61
<b>Chapter 4</b>	C/D box snoRNA SNORD113-6/AF357425 plays a dual role in integrin signalling and arterial fibroblast function via pre-mRNA processing and 2'-O-ribose methylation	93
<b>Chapter 5</b>	C/D box snoRNA SNORD113-6 guides 2' O-methylation and protects against site-specific fragmentation of tRNA <sup>Leu</sup> (TAA) in human arterial fibroblasts	145
<b>Chapter 6</b>	General discussion and future perspectives	173
<b>Appendix</b>	Nederlandse samenvatting	193
	List of publications	207
	Curriculum Vitae	213
	Dankwoord	216
