The background is a watercolor illustration. At the top, there are soft, blended washes of yellow, orange, and light green, suggesting a bright sky. In the center, a large, solid green semi-circle represents a sun or moon, with a white, misty glow around its base. Below this, the scene opens up to a body of water depicted with horizontal, wavy brushstrokes in various shades of blue, teal, and light green. On the right side, a dark green, rounded landmass or hillside slopes down towards the water. The overall style is soft and painterly.

# **NEAR-INFRARED FLUORESCENCE IMAGING WITH INDOCYANINE GREEN IN VASCULAR SURGERY**

The quest for reliable quantification of tissue  
perfusion and potential clinical applications
