The background is a watercolor illustration. At the top, there are soft, blended washes of yellow, orange, and light green, suggesting a sky or a hazy atmosphere. In the center, a large, solid green semi-circle, resembling a sun or a moon, is positioned on a horizon line. Below this, the lower half of the image is filled with horizontal, wavy bands of various shades of green and blue, creating a sense of depth and movement, like water or a landscape. On the right side, a dark green, rounded mountain peak or landmass rises from the water. The overall style is soft and artistic, with visible brushstrokes and a rich, natural color palette.

NEAR-INFRARED FLUORESCENCE IMAGING WITH INDOCYANINE GREEN IN VASCULAR SURGERY

The quest for reliable quantification of tissue
perfusion and potential clinical applications

Pim van den Hoven
