Near-infrared fluorescence imaging with indocyanine green in vascular surgery

The quest for reliable quantification of tissue
perfusion and potential clinical applications

Financial support by the Dutch Heart Foundation for the publication of this thesis is gratefully acknowledged.

Renew Health Limited, Quest Innovations, Voetencentrum Wender, Krijnen Medical, Erbe, KARL STORZ Endoscopie Nederland B.V., Chipsoft and the Alrijne Wetenschapsfonds are also gratefully acknowledged for their financial support for the printing of this thesis.

Near-infrared fluorescence imaging with indocyanine green in vascular surgery

The quest for reliable quantification of tissue
perfusion and potential clinical applications

Proefschrift

ter verkrijging van
de graad van doctor aan de Universiteit Leiden,
op gezag van rector magnificus prof. dr. ir. H. Bijl,
volgens besluit van het college voor promoties
te verdedigen op donderdag 9 juni 2022
klokke 11.15 uur

door

Pim van den Hoven
Geboren te Hengelo
in 1990

Promotor

Prof. dr. J.F. Hamming

Copromotoren

Dr. J.R. van der Vorst

Dr. A.L. Vahrmeijer

Leden promotiecommissie

Prof. dr. P.H.A. Quax

Prof. dr. J. Burggraaf

Prof. dr. R.H. Geelkerken (Medisch Spectrum Twente, Enschede)

Dr. K.K. Yeung (Amsterdam Universitair Medisch Centrum, Amsterdam)

Table of contents

Chapter 1	Introduction and thesis outline	9
Part I	Quantification of tissue perfusion using near-infrared fluorescence imaging with indocyanine green	17
Chapter 2	A systematic review of the use of near-infrared fluorescence imaging in patients with peripheral artery disease	19
Chapter 3	Perfusion parameters in near-infrared fluorescence imaging with indocyanine green: a systematic review of the literature	43
Chapter 4	Perfusion patterns in patients with chronic limb-threatening ischemia versus control patients using near-infrared fluorescence imaging with indocyanine green	73
Chapter 5	Normalization of time-intensity curves for quantification of foot perfusion using near-infrared fluorescence imaging with indocyanine green	87
Chapter 6	Quantification of near-infrared fluorescence imaging with indocyanine green in free flap breast reconstruction	105
Part II	Clinical translation of quantitative tissue perfusion assessment using near-infrared fluorescence imaging with indocyanine green in lower extremity arterial disease	119
Chapter 7	Near-infrared fluorescence imaging with indocyanine green for quantification of changes in tissue perfusion following revascularization	121
Chapter 8	Assessment of tissue viability following amputation surgery using near-infrared fluorescence imaging with indocyanine green	135
Part III	Summary, discussion and appendices	149
Chapter 9	Summary, discussion and future perspectives	151

Chapter 10	Dutch summary (Nederlandse samenvatting)	161
	Curriculum Vitae	166
	List of publications	167
	Dankwoord	169
