The impacts and challenges of water use of electric power production in China

Proefschrift

ter verkrijging van
de graad van doctor aan de Universiteit Leiden,
op gezag van rector magnificus prof.dr.ir. H. Bijl,
volgens besluit van het college voor promoties
te verdedigen op dinsdag 21 juni 2022
klokke 11:15 uur

door

Yi Jin
geboren te Suzhou city, Jiangsu province, China
in 1992

Promotor:

Prof. dr. A. Tukker

Co-promotores:

Dr. P. Behrens

Dr. L. Scherer

Promotiecommissie:

Prof. dr. E. van der Voet

Prof. dr. H. X. Lin

Prof. dr. A. Ramírez (Technische Universiteit Delft)

Dr. S. Pfister (ETH Zurich)

Dr. R. Wang

Table of Contents

Chapter 1	General Introduction	1
Chapter 2	Water use of electricity technologies: A global meta-analysis	9
Chapter 3	The energy-water nexus of China's interprovincial and seasonal electric power transmission	31
Chapter 4	Biodiversity loss from freshwater use for China's electricity generation	55
Chapter 5	Climate change and CCS increase the water vulnerability of China's thermoelectric power fleet	75
Chapter 6	General Discussion	95
Chapter 7	Supplementary Information	107
