Myocardial Injury in Acute Myocardial
Infarction and the Assessment of
Valvular Heart Disease**

Tomaž Podlesnikar

Multimodality Imaging for Myocardial Injury in Acute Myocardial Infarction and the Assessment of Valvular Heart Disease

The studies described in this thesis were performed at the Department of Cardiology of the Leiden University Medical Center, Leiden, The Netherlands

Cover: T. Podlesnikar

Layout: T. Podlesnikar, T. Pogorevc

Edition: 1st edition

Place: Leiden, The Netherlands

Self-published by T. Podlesnikar

Year of publishing: 2022

Printrun: 50 copies

Printing: Design Sudio

Proefschrift

ter verkrijging van
de graad van doctor aan de Universiteit Leiden,
op gezag van rector magnificus prof.dr.ir. H. Bijl,
volgens besluit van het college voor promoties
te verdedigen op dinsdag 28 juni 2022
klokke 13.30 uur

door

Tomaž Podlesnikar

geboren te Maribor, Slovenië
in 1981

Promotor:

Prof. dr. J.J. Bax

Co-promotor:

Dr. V. Delgado

Leiden Promotiecommissie:

Prof. dr. J. Braun

Dr. N. Ajmone Marsan

Dr. M. Bootsma

Prof. dr. B. Ibáñez Centro Nacional de Investigaciones Cardiovasculares (CNIC), Madrid, Spain; IIS-Fundación Jiménez Díaz University Hospital, Madrid, Spain

Dr. C. Bucciarelli-Ducci Royal Brompton & Harefield Hospitals, London, United Kingdom

Prof. dr. Z. Fras Univerzitetni klinični center Ljubljana, Ljubljana, Slovenia

*To Blanka and Tibor,
to my mum and dad*

Financial support by the Dutch Heart Foundation for the publication of this thesis is gratefully acknowledged

TABLE OF CONTENTS

Chapter 1	General introduction and outline of the thesis	8
Part I	Cardiovascular magnetic resonance-derived left ventricular strain in acute myocardial infarction	
Chapter 2	Effect of early metoprolol during ST-segment elevation myocardial infarction on left ventricular strain: feature-tracking cardiovascular magnetic resonance substudy from the METOCARD-CNIC trial	26
Chapter 3	Left ventricular functional recovery of infarcted and remote myocardium after ST-segment elevation myocardial infarction (METOCARD-CNIC randomized clinical trial substudy)	46
Chapter 4	Five-year outcomes and prognostic value of feature-tracking cardiovascular magnetic resonance in patients receiving early prereperfusion metoprolol in acute myocardial infarction	68
Part II	Multimodality cardiac imaging in valvular heart disease	
Chapter 5	Imaging of valvular heart disease in heart failure	88
Chapter 6	Transcatheter aortic valve replacement: advantages and limitations of different cardiac imaging techniques	110
Chapter 7	Influence of the quantity of aortic valve calcium on the agreement between automated 3-dimensional transesophageal echocardiography and multidetector row computed tomography for aortic annulus sizing	140
Chapter 8	Cardiovascular magnetic resonance imaging to assess myocardial fibrosis in valvular heart disease	158
Chapter 9	Focal replacement and diffuse fibrosis in primary mitral regurgitation: a new piece to the puzzle	186
Chapter 10	Summary, conclusions and future perspectives	194
	Samenvatting, conclusies en toekomstperspectieven	
Appendix	List of publications	219
	Acknowledgements	223
	Curriculum vitae	225
