Contents

Chapter 1	General introduction	7
Chapter 2	Addition of a 161-SNP polygenic risk score to family history-based risk prediction: impact on clinical management in non-BRCA1/2 breast cancer families <i>Lakeman IMM, et al. Journal of Medical Genetics 2019;56:581-589</i>	37
Chapter 3	Clinical applicability of the Polygenic Risk Score for breast cancer risk prediction in familial cases <i>Lakeman IMM, et al. Submitted</i>	63
Chapter 4	Validation of the BOADICEA model and a 313-variant polygenic risk score for breast cancer risk prediction in a Dutch prospective cohort <i>Lakeman IMM, et al. Genetics in Medicine 2020;22:1803-1811</i>	103
Chapter 5	The predictive ability of the 313 variant-based polygenic risk score for contralateral breast cancer risk prediction in women of European ancestry with a heterozygous <i>BRCA1</i> or <i>BRCA2</i> pathogenic variant <i>Lakeman IMM, et al. Genetics in Medicine 2021;23:1726-1737</i>	135
Chapter 6	Comprehensive breast cancer risk prediction for women from non-BRCA1/2 breast cancer families – an observational pilot study in one Dutch medical centre	167
Chapter 7	Discussion and future perspectives	181
Chapter 8	Nederlandse samenvatting	201
	List of publications	211
	Curriculum Vitae	214
	Dankwoord	215
Appendix 1	Argumenten voor centrale toetsing niet WMO-plichtig multicenter onderzoek	219
