Improving survival prediction models for liver transplantation candidates

PROEFSCHRIFT

ter verkrijging van
de graad van doctor aan de Universiteit Leiden,
op gezag van rector magnificus prof. dr. ir. H. Bijl,
volgens besluit van het college voor promoties,
te verdedigen op woensdag 29 juni 2022
klokke 15.00 uur

door

Ben Felix Jacob Goudsmit

Promotores:

prof. dr. B. van Hoek
prof. dr. H. Putter

Copromotor:

dr. A.E. Braat

Leden promotiecommissie:

prof. dr. H.J. Metselaar	Erasmus Universiteit Rotterdam
prof. dr. J. Pirenne	Katholieke Universiteit Leuven
prof. dr. I.P.J. Alwayn	
prof. dr. M. Fiocco	
dr. M.J. Coenraad	

Voor mijn ouders, jullie hebben me alles gegeven

Contents

1 General introduction **3**

Part I: Forms of MELD **21**

2 Validation of the Model for End-stage Liver Disease sodium (MELD-Na) score in the Eurotransplant region **23**

3 Refitting the Model for End-stage Liver Disease for the Eurotransplant region **49**

Part II: Disease over time **75**

4 Joint modelling of liver transplant candidates outperforms the model for end-stage liver disease: the effect of disease development over time on patient outcome **77**

5 Development and validation of a dynamic survival prediction model for patients with acute-on-chronic liver failure **103**

Part III: Survival with and without transplantation **127**

6 Survival benefit from liver transplantation for patients with and without hepatocellular carcinoma **129**

Part IV: Summary, general discussion, and future perspectives 159

7 Summary 161

8 General discussion 165

9 Future perspectives 189

10 Appendix 203

10.1 Supplement Chapter: The Model for End-stage Liver Disease 3.0: an update without proven accuracy 204

10.2 Supplement Chapter: The role of the model for end-stage liver disease-sodium score and joint models for 90-day mortality prediction in patients with acute-on-chronic liver failure. 208

Nederlandse samenvatting (Summary in Dutch) 215

Verbetering van voorspellingsmodellen voor levertransplantatiekandidaten 216

Dankwoord 221
