# Non-linear Astrochemical Kinetics

## - Theory and Applications -

Proefschrift

ter verkrijging van  
de graad van doctor aan de Universiteit Leiden,  
op gezag van rector magnificus prof.dr.ir. H. Bijl,  
volgens besluit van het college voor promoties  
te verdedigen op dinsdag 21 juni 2022  
klokke 10:00 uur  
door

Gwénaëlle C. Dufour

geboren te Floirac, Frankrijk  
in 1991

**Promotor:**

Prof. dr. H. V. J. Linnartz

**Co-promotor:**

Dr. S. B. Charnley

**Promotiecommissie:**

Prof. dr. H.J.A. Röttgering

Prof. dr. S. Viti

Prof. dr. P. Ehrenfreund

Prof. dr. H.M. Cuppen (Radboud University)

Dr. U. Gorti (NASA Ames)

**Front cover:**

NGC 3572 and the Southern Tadpoles by Carlos Taylor

# CONTENTS

|          |   |           |
|----------|---|-----------|
| <b>1</b> | <b>Introduction</b>   | <b>1</b>  |
| 1.1      | Astrochemistry . . . . .  | 1         |
| 1.2      | Astrochemical kinetics . . . . .  | 2         |
| 1.2.1    | Interstellar synthesis . . . . .  | 4         |
| 1.2.2    | Methods . . . . .   | 6         |
| 1.2.3    | Non-linear dynamical phenomena . . . . .  | 9         |
| 1.3      | This thesis . . . . .   | 10        |
| <b>2</b> | <b>Astrochemical Bistability: Autocatalysis in Oxygen Chemistry</b>                           | <b>15</b> |
| 2.1      | Introduction . . . . .  | 16        |
| 2.2      | Chemical bistability in dense clouds . . . . .  | 16        |
| 2.2.1    | Model calculations . . . . .  | 17        |
| 2.2.2    | Oxygen chemistry: autocatalysis & feedback . . . . .  | 18        |
| 2.2.3    | Dense cloud chemistry reconstructed . . . . .   | 20        |
| 2.3      | Discussion: ion-grain neutralization . . . . .  | 22        |
| 2.4      | Conclusions . . . . .   | 25        |
| <b>3</b> | <b>New Bistable Solutions in Molecular Cloud Chemistry: Nitrogen and Carbon Autocatalysis</b> | <b>27</b> |
| 3.1      | Introduction . . . . .  | 28        |
| 3.2      | Model calculation . . . . .   | 29        |
| 3.3      | Bifurcation analysis . . . . .  | 31        |
| 3.3.1    | Effect of elemental depletion . . . . .   | 31        |
| 3.3.2    | The nitrogen chemistry . . . . .  | 33        |
| 3.3.3    | The carbon chemistry . . . . .  | 35        |
| 3.4      | Discussion . . . . .  | 38        |
| 3.5      | Conclusions . . . . .   | 41        |
| <b>4</b> | <b>Oscillations in Gas-grain Astrochemical Kinetics</b>                                       | <b>43</b> |
| 4.1      | Introduction . . . . .  | 44        |
| 4.2      | Theory . . . . .  | 45        |
| 4.2.1    | Bistable solutions in gas-phase chemistry . . . . .   | 45        |
| 4.2.2    | Gas-grain interaction in cold interstellar clouds . . . . .                                   | 46        |
| 4.3      | Chemical model . . . . .  | 48        |

|                                 |   |            |
|---------------------------------|---|------------|
| 4.3.1                           | Surface binding energies . . . . .  | 48         |
| 4.4                             | Bifurcations and oscillations in interstellar oxygen chemistry . . . . .                            | 50         |
| 4.5                             | Relaxation oscillations in molecular clouds . . . . .   | 51         |
| 4.5.1                           | Relaxation oscillations at $n_H = 1 \times 10^4 \text{ cm}^{-3}$ . . . . .                          | 51         |
| 4.5.2                           | Relaxation oscillations at $n_H = 1 \times 10^5 \text{ cm}^{-3}$ . . . . .                          | 53         |
| 4.6                             | Discussion . . . . .  | 54         |
| 4.7                             | Conclusions . . . . .   | 57         |
