Spatiotemporal building stock modeling for residential decarbonization in the Netherlands

Proefschrift

ter verkrijging van

de graad van doctor aan de Universiteit Leiden,

op gezag van rector magnificus prof.dr.ir. H. Bijl,

volgens besluit van het college voor promoties

te verdedigen op dinsdag 28 juni 2022

klokke 10.00 uur

door

Xining Yang

geboren te Baoding, Hebei province, China

in 1991

Promotor:

Prof. dr. A. Tukker

Co-promotores:

Dr. B. Steubing

Dr. M. Hu

Promotiecommissie:

Prof. dr. H.X. Lin

Prof. dr. E. van der Voet

Prof. dr. S. Pauliuk (University of Freiburg, Germany)

Dr. T. Fishman

Dr. D. Peck (Technische Universiteit Delft)

Table of Contents

Chapter 1 General introduction	1
Chapter 2 A combined GIS-archetype approach to model residential space heating energy: A case study for the Netherlands including validation	15
Chapter 3 A bottom-up dynamic building stock model for residential energy transition: A case study for the Netherlands	33
Chapter 4 Urban mining potential to reduce primary material use and carbon emissions in the Dutch residential building sector	51
Chapter 5 Key strategies for decarbonizing the residential building stock: Results from a spatiotemporal model for the Netherlands	67
Chapter 6 General discussion	85
Chapter 7 Appendix	95
References	161
Summary.....	185
Samenvatting	188
Acknowledgments	191
List of publications	192
Curriculum Vitae	193
