Using human pluripotent stem cell-derived cardiomyocytes to understand genetic variant pathogenicity in the ion channelopathy LQT2

Proefschrift

ter verkrijging van
de graad van doctor aan de Universiteit Leiden,
op gezag van rector magnificus prof.dr.ir. H. Bijl,
volgens besluit van het college voor promoties
te verdedigen op donderdag 1 september 2022
klokke 16:15 uur

door

Aletta Hendrika van den Brink
geboren te Veenendaal
in 1992

Promotor	Prof. dr. C.L. Mummery
Co-promotor	Dr. R.P. Davis
Promotiecommissie	Prof. dr. M.J.T.H. Goumans Prof. dr. N. Geijsen Prof. dr. P.C.J.J. Passier (Universiteit Twente) Dr. C.A. Remme (Amsterdam UMC)

The research described in this thesis was supported by a Starting Grant (STEMCARDIORISK) from the European Research Council (ERC) under the European Union's Horizon 2020 Research and Innovation programme, a VIDI fellowship from The Netherlands Organisation for Scientific Research [Nederlandse Organisatie voor Wetenschappelijk Onderzoek (NWO)], and The Netherlands Organ-on-Chip Initiative, an NWO Gravitation project funded by the Ministry of Education, Culture and Science of the government of The Netherlands.

Financial support by the Dutch Heart Foundation and Stichting Proefdiervrij for the publication of this thesis is gratefully acknowledged.

Table of contents

CHAPTER 1	Introduction of the thesis	8
CHAPTER 2	Inherited cardiac diseases, pluripotent stem cells and genome editing combined - the past, present and future	30
CHAPTER 3	Cryopreservation of human pluripotent stem cell-derived cardiomyocytes is not detrimental to their molecular and functional properties	64
CHAPTER 4	Isogenic sets of hiPSC-CMs harboring distinct <i>KCNH2</i> mutations differ functionally and in susceptibility to drug-induced arrhythmias	94
CHAPTER 5	The linkage phase of the polymorphism <i>KCNH2</i> -K897T influences the electrophysiological phenotype in hiPSC models of LQT2	136
CHAPTER 6	Isogenic hiPSC-CMs with <i>KCNH2</i> mutations demonstrate gene-dosage dependent electrophysiological phenotype	172
CHAPTER 7	General discussion	204
APPENDICES	Summary	218
	Nederlandse samenvatting	220
