No part of this thesis may be reproduced, stored in retrieval system or transmitted in any form by any means, without the permission of the author, or when appropriate, of the publisher of the represented published articles.

This research was financially supported by the Reumafonds under agreement DAF-16-1-405 and was performed in the framework of the Medical Delta program Regenerative Medicine 4D: Generating complex tissues with stem cells and printing technology and Improving Mobility with Technology.

Medical Delta and the Nederlandse Vereniging voor Matrix Biologie are gratefully acknowledged for financial support for the printing costs of this thesis.

Bookdesign/lay-out: Selina Abraham, Marcella van Hoolwerff

Printing: Ridderprint

Dissecting cellular function of fibronectin in osteoarthritic cartilage

Proefschrift

ter verkrijging van
de graad van doctor aan de Universiteit Leiden,
op gezag van rector magnificus prof.dr.ir. H. Bijl,
volgens besluit van het college voor promoties
te verdedigen op dinsdag 6 september 2022
klokke 16.15 uur

door

Marcella van Hoolwerff
geboren te Delft
in 1990

Voor papa

Promotor	Prof. dr. I. Meulenbelt
Co-promotor	Dr. Y.F.M. Ramos
Commissieleden	Prof. dr. B.T. Heijmans
	Prof. dr. P.M. van der Kraan (Radboud Universiteit)
	Prof. dr. F. Zucke (University Hospital Frankfurt)
	Prof. dr. J.V.M.G Bovée

Contents

Chapter 1	9
Introduction	
Chapter 2	29
Elucidating epigenetic regulation by identifying functional <i>cis</i> -acting long noncoding RNAs and their targets in osteoarthritic articular cartilage	
Chapter 3	65
High-impact <i>FN1</i> mutation decreases chondrogenic potential and affects cartilage deposition via decreased binding to collagen type II	
Chapter 4	97
Identification and functional characterization of imbalanced osteoarthritis associated fibronectin splice variants	
Chapter 5	127
General discussion	
Chapter 6	147
Appendix	
- Nederlandse samenvatting	
- List of publications	
- Curriculum Vitae	
- Dankwoord
