**High fidelity DNA replication and repair: new structures
and mechanisms using cryogenic electron microscopy**

Alessandro Borsellini

PhD Thesis, Leiden University, 2022

The research described in this thesis was performed at Leiden University Medical Centre, Department of Cell and Chemical Biology, The Netherlands

High fidelity DNA replication and repair: new structures and mechanisms using cryogenic electron microscopy

Proefschrift

ter verkrijging van
de graad van doctor aan de Universiteit Leiden,
op gezag van rector magnificus prof. dr. ir. H. Bijl
volgens besluit van het college voor promoties
te verdedigen op woensdag 19 oktober 2022
klokke 16.15 uur

door

Alessandro Borsellini
geboren te Rome, Italië
in 1992

Promotor: Prof. dr. J.J.C. Neefjes

Co-promotor Dr. M. H. Lamers

Leiden Promotiecommissie: Prof. dr. M. Tijsterman

Prof. dr. T. Sixma, NKI, Amsterdam

Prof. dr. H. van Attikum

Dr. R. F. Leiro, CNIO, Madrid

Dr. S. Noordermeer

“DNA can be said to exert power over its own future”

Richard Dawkins, *The Blind Watchmaker*, 1986

Table of contents

Chapter 1	General introduction	3
Chapter 2	Cryo-EM structures reveal how ATP and DNA binding in MutS coordinate sequential steps of DNA mismatch repair	22
Chapter 3	MutL binds to 3' resected DNA ends and blocks DNA polymerase access	51
Chapter 4	DNA-dependent binding of nargenicin to DnaE1 inhibits replication in <i>Mycobacterium tuberculosis</i>	77
Chapter 5	An air-blades based plunge freezer for improved cryo-EM grid preparation	121
Chapter 6	Discussion	137
Appendix	Nederlandse Samenvatting Curriculum Vitae List of Publications Acknowledgements	

Index

Introduction

Background on DNA	3
DNA replication.....	4
Replication fidelity	5
DNA mismatch repair.....	6
The MutS protein.....	8
Conformational changes of MutS during DNA mismatch repair.....	9
The MutL protein.....	9
The interplay between excision and resynthesis.....	10
DNA replication as a novel target for antibiotics	11
Novel antibiotics targeting bacterial replicative DNA polymerases	13
An air-blades based plunge freezer for improved cryo-EM grid preparation	13
Thesis outline.....	15
References.....	16

Cryo-EM structures reveal how ATP and DNA binding in MutS coordinate sequential steps of DNA mismatch repair

Abstract.....	23
Introduction.....	23
Results	24
Discussion.....	32
Material and methods	35
Supplementary Material.....	42
References.....	47

MutL binds to 3' resected DNA ends and blocks DNA polymerase access

Abstract.....	52
Introduction.....	52
Results	54

Discussion.....	60
Material And Methods.....	65
Supplementary material.....	69
References.....	72

DNA-dependent binding of nargenicin to DnaE1 inhibits replication in *Mycobacterium tuberculosis*

Abstract.....	78
Introduction.....	78
Results	80
Discussion.....	87
Material and methods	90
Supplementary material.....	99
References.....	111

An air-blades based plunge freezer for improved cryo-EM grid preparation

Abstract.....	122
Introduction.....	122
Results	123
Discussion.....	128
Material And Methods.....	129
Supplementary material.....	133
References.....	134

Discussion

.....	137
References.....	141
