Copyright of each chapter is with the publisher of the journal in which the work has appeared. No part of this thesis may be reproduced, stored in retrieval system or transmitted in any form by any means, without the permission of the author, or when appropriate, of the publisher of the represented published articles.

The research presented in this thesis was performed at the Department of Molecular Epidemiology, Leiden University Medical Center, Leiden, The Netherlands. This research was supported by the Dutch Arthritis Society (DAF-16-1-406 and DAF-16-1-405), and the Dutch Scientific Research council NWO/ZonMW VICI scheme (no. 91816631/528). This work was partly supported by grants from Marie Curie Initial Training Network (Euroclast, FP7-People-2013-ITN: #607447). Data are generated within the scope of the Medical Delta programmes Regenerative Medicine 4D and Improving Mobility with Technology.

Printing of this thesis has been possible thanks to the sponsorship of ChemoMetec, PeproTech, Nederlandse vereniging voor Matrix Biologie (NVMB), Tebu-bio, Sanbio Research & Diagnostics, Proefdiervrij and Medical Delta.

Osteoprotegerin, a double-edged sword in osteoarthritis development

Proefschrift

ter verkrijging van
de graad van doctor aan de Universiteit Leiden,
op het gezag van rector magnificus prof.dr.ir. H. Bijl,
volgens besluit van het college voor promoties
te verdedigen op woensdag 19 oktober 2022
klokke 10.00 uur

door

Alejandro Rodríguez Ruiz

geboren te Valencia, Spanje
in 1992

Promotor:
Copromotor:

Prof. dr. I. Meulenbelt
Dr. Y. F. M. Ramos

Leden promotiecommissie:

Prof. Dr. C. L. Mummery
Prof. Dr. G. J. V. M. van Osch
(Erasmus Medical Centre)
Dr. T. J. de Vries
(Academic Centre for Dentistry Amsterdam)
Dr. J. Geurts
(Lausanne University Hospital)

Table of contents

Chapter 1

General Introduction	7
----------------------	---

Chapter 2

The role of <i>TNFRSF11B</i> in development of osteoarthritic cartilage	33
---	----

Chapter 3

Cartilage from human-induced pluripotent stem cells: comparison with neo-cartilage from chondrocytes and bone marrow mesenchymal stromal cells	57
--	----

Chapter 4

Readthrough mutation at CCAL1 locus in <i>TNFRSF11B</i> deciphers role of immobilized osteoprotegerin in subchondral bone turnover and cartilage mineralization in humans	87
---	----

Chapter 5

General discussion	121
--------------------	-----

Addendum
