Exploring the *Mycobacterium tuberculosis* antigenome

New insights for the development of vaccines, diagnostics and drugs

Mariateresa Coppola

Exploring the *Mycobacterium tuberculosis* antigenome.
New insights for the development of vaccines, diagnostics and drugs.
PhD thesis, Leiden University, The Netherlands

Cover design © Mariateresa Coppola & Elma Hogeboom 2022
Cover artwork © Mariateresa Coppola 2022
Cover digitalization by Elma Hogeboom for GreenThesis
Layout by Mariateresa Coppola, Matthias Heemskerk and ProefschriftMaken (Marian Sloot).

Proudly printed on 100% recycled paper.

A tree has been planted for every copy of this thesis.

The conducted research was supported by EC ITN FP7 VACTRAIN project; and by TBVAC2020 Grant of EC HOR2020 (Grant Agreement No. 643381).
The publication of this thesis was financially supported by KNCV Tuberculosis Foundation.

Exploring the *Mycobacterium tuberculosis* antigenome

New insights for the development of vaccines, diagnostics and drugs

PROEFSCHRIFT

ter verkrijging van
de graad van doctor aan de Universiteit Leiden,
op gezag van rector magnificus prof.dr.ir. H. Bijl,
volgens besluit van het college voor promoties
te verdedigen op donderdag 3 november 2022
klokke 11.15 uur

door

Mariateresa Coppola
geboren te Potenza, Italië
in 1988

Promotor
Prof. dr. T.H.M. Ottenhoff

Co-promotor
Prof. dr. A. Geluk

Leden promotiecommissie
Prof. dr. H.H. Smits
Prof. dr. L.G. Visser
Prof. dr. P.S. Hiemstra
Prof. dr. H. M. Dockrell (London School of Hygiene & Tropical Medicine)
Prof. dr. S. Stenger (University Hospital Ulm)

‘Izzy,’ she would say, ‘did you ask a good question today?’
Sheindel Rabi

TABLE OF CONTENTS

Chapter 1	General introduction and thesis outline	9
Chapter 2	New genome-wide algorithm identifies novel *in vivo* expressed *Mycobacterium tuberculosis* antigens inducing human T-cell responses with classical and unconventional cytokine profiles	47
Chapter 3	Cell-mediated immune responses to *in vivo*-expressed and stage-specific *Mycobacterium tuberculosis* antigens in latent and active tuberculosis across different age groups	93
Chapter 4	*Mycobacterium tuberculosis in vivo* expressed antigens recognized in three genetically different mouse models after *Mycobacterium tuberculosis* infection and BCG vaccination.	125
Chapter 5	Differences in IgG responses against infection phase related *Mycobacterium tuberculosis* (*Mtb*) specific antigens in individuals exposed or not to *Mtb* correlate with control of TB infection and progression	153
Chapter 6	The *in vivo* transcriptomic blueprint of *Mycobacterium tuberculosis* in the lung	175
Chapter 7	Vaccines for leprosy and tuberculosis: opportunities for shared research, development and application	211
Chapter 8	General discussion and future perspectives	237
Chapter 9	Appendix	261
	Nederlandse samenvatting	263
	List of Publications	266
	About the Author	268
	Acknowledgments	269
