The author gratefully acknowledges financial support for the reproduction of this thesis by the Dutch Ministry of Defence.

Cover image

'Aap in kooi' (2018) by Stef Fridael

'Monkey in cage' is a painting in which artist Stef Fridael (an Afghanistan-veteran himself) depicts the state of mind of someone who is confronted with the long-term processing of military trauma

Prof. dr. M. Olf (Amsterdam UMC)
Prof. dr. S.M. Sijbrandij (Vrije Universiteit Amsterdam)

“Een mensenleven is een verzameling, een enorme opeenhoping bewegingen en denkbeelden. Het meeste gaat voor altijd verloren en het kan niet anders of het geheugen begaat in de keuze van wat het vasthoudt of verliest, een wanhopige willekeur.”

W.F. Hermans
'Preamble' in Paranoia

TABLE OF CONTENTS

Chapter 1	9
General introduction	
Chapter 2	17
Cohort profile: the Prospective Research In Stress-Related Military Operations (PRISMO) study in the Dutch Armed Forces	
Chapter 3	39
Long-term development of post-traumatic stress symptoms and associated risk factors in military service members deployed to Afghanistan: Results from the PRISMO 10-year follow-up	
Chapter 4	73
Long-term risk for mental health symptoms in Dutch ISAF veterans: the role of perceived social support	
Chapter 5	109
Associations between the development of PTSD symptoms and longitudinal changes in the DNA methylome of deployed military servicemen: A comparison with polygenic risk scores	
Chapter 6	143
The prediction of long-term PTSD symptom development in military personnel: applying machine learning to pre-deployment risk factors	
Chapter 7	175
Summary and general discussion	
Appendices	191
Nederlandse samenvatting	192
List of publications	197
Curriculum Vitae	198
Dankwoord	200
