Protein arginine methyltransferases as modulators of lipid metabolism and inflammation and the relevance for atherosclerosis

Proefschrift

ter verkrijging van de graad van doctor aan de Universiteit Leiden,
op gezag van rector magnificus prof.dr.ir. H. Bijl,
volgens besluit van het college voor promoties
te verdedigen op donderdag 15 december 2022
klokke 12.30 uur

door

Yiheng Zhang

geboren te Nanning, Guanxi, China

in 1991

Promotor: Prof. dr. M. van Eck

Co-promotor: Dr. M. Hoekstra

Promotiecommissie:

Prof. dr. H. Irth

Prof. dr. J.A. Bouwstra

Prof. dr. ir. J.A.P. Willems van Dijk

Prof. dr. Y. Wang (Xi'an Jiaotong University, China)

Prof. dr. ir. A.H. Kersten (Wageningen University)

Prof. dr. R. Shiri-Sverdlov (Maastricht University)

The research described in this thesis was performed at the division BioTherapeutics of the Leiden Academic Centre for Drug Research (LACDR), Leiden University (Leiden, The Netherlands). The research was financially supported by China Scholarship Council (CSC).

Contents

Chapter 1	General introduction and thesis outlines	3
Chapter 2	PRMT1 inhibitor TC-E 5003 reduces the development of non-alcoholic fatty liver disease and atherosclerotic lesions in Western-type diet-fed LDL receptor knockout mice	25
Chapter 3	PRMT4 inhibitor TP-064 inhibits the pro-inflammatory macrophage lipopolysaccharide response in vitro and ex vivo and induces peritonitis-associated neutrophilia in vivo	47
Chapter 4	PRMT4 inhibitor TP-064 impacts both inflammatory and metabolic processes without changing the susceptibility for early atherosclerotic lesions in male apolipoprotein E knockout mice	75
Chapter 5	PRMT5 inhibitor GSK3326595 enhances interferon gamma-stimulated pro-inflammatory macrophage polarization and increases hepatic triglyceride levels without affecting early atherosclerotic lesion development in mice	97
Chapter 6	Summary, General Discussion and Perspectives	125
	Nederlandse samenvatting	140
	PhD portfolio	
	List of publications	
	Curriculum Vitae
