Lithium-ion batteries and the transition to electric vehicles — environmental challenges and opportunities from a life cycle perspective

Proefschrift

ter verkrijging van
de graad van doctor aan de Universiteit Leiden,
op gezag van rector magnificus prof.dr.ir. H. Bijl,
volgens besluit van het college voor promoties
te verdedigen op woensdag 21 december 2022
klokke 16.15 uur

door

Chengjian Xu
geboren te Yancheng, China
in 1993

Promotor:

Prof. dr. A. Tukker

Co-promotores:

Dr. B. Steubing

Dr. M. Hu

Promotiecommissie:

Prof. dr. E. van der Voet

Prof. dr. H. X. Lin

Dr. S. Cucurachi

Prof. dr. D.B. Müller (Norwegian University of Science and Technology)

Dr. A. Nordelöf (Chalmers University of Technology)

Table of Contents

1 General introduction..... 1

2 Future material demand for automotive lithium-based batteries.....11

3 Future greenhouse gas emissions of automotive lithium-ion battery cell production.....85

4 Future greenhouse gas emissions of global automotive lithium-ion battery cells and recycling potential till 2050..... 109

5 Electric vehicle batteries alone could satisfy short-term grid storage demand by as early as 2030 125

6 General discussion..... 171

References 187

Summary 205

Samenvatting 209

Acknowledgements..... 213

Curriculum Vitae..... 215
