Innovative (electro-driven) sample preparation tools for metabolomics study of muscle aging

Proefschrift

ter verkrijging van de graad van doctor aan de Universiteit Leiden,
op gezag van rector magnificus prof.dr.ir. H. Bijl,
volgens besluit van het college voor promoties
te verdedigen op woensdag 11 januari 2023
klokke 11:15 uur

door

The research described in this thesis was performed at Metabolomics and Analytics Center (MAC) of the Leiden Academic Centre for Drug Research (LACDR), Leiden University (Leiden, The Netherlands). The research was financially supported by the Netherlands Organisation for Scientific Research (NWO) in the Building Blocks of Life.

Contents

Chapter 1

General introduction and scope 2

Chapter 2

A high-throughput, ultrafast, and online three-phase electro-extraction method for analysis of trace level basic pharmaceuticals 19

Chapter 3

Development of a fast, online three-phase electro-extraction hyphenated to fast liquid chromatography–mass spectrometry for analysis of trace-level acid pharmaceuticals in plasma 43

Chapter 4

A fully automated and high-throughput three-phase electro-extraction setup hyphenated to LC-MS analysis 61

Chapter 5

A sample preparation method for simultaneous profiling of signaling lipids and polar metabolites in small quantities of muscle tissues from a mouse model for sarcopenia 107

Chapter 6

Metabolomic analysis of dietary-restriction-induced attenuation of sarcopenia in prematurely aging DNA repair-deficient mice 141

Chapter 7

Conclusions and perspectives 179
