Proefschrift

ter verkrijging van

de graad van doctor aan de Universiteit Leiden,  
op gezag van rector magnificus prof.dr. ir. H. Bijl,  
volgens besluit van het college voor promoties  
te verdedigen op woensdag 11 januari 2023

klokke 15:00

door

Sophie Gabrielle Groene

geboren te Hoofddorp

in 1997

**Promotores**

Prof. dr. E. Lopriore

Prof. dr. B.T. Heijmans

**Co-promotor**

Dr. J.M.M. van Klink

**Leden promotiecommissie**

Prof. dr. E.H.H.M. Rings

Prof. dr. L. Lewi, Universitair Ziekenhuis Leuven, Leuven

Prof. dr. S. Counsell, King's College London, London

Prof. dr. T.J. Roseboom, Amsterdam Universitair Medisch Centrum, Amsterdam

# Table of contents

General introduction and outline of this thesis	9
<u>Part I: From unequal placental sharing to a discordant intrauterine environment</u>	
<b>Chapter 1:</b> Placental characteristics in monochorionic twins with selective fetal growth restriction in relation to umbilical artery Doppler classification.	23
<b>Chapter 2:</b> Impact of placental sharing and large bidirectional anastomoses on birth weight discordance in monochorionic twins: a retrospective cohort study in 449 cases.	37
<u>Part II: From fetus to newborn</u>	
<b>Chapter 3:</b> The optimal gestational age at birth for monochorionic twins with selective fetal growth restriction: a systematic literature review.	61
<b>Chapter 4:</b> Respiratory distress syndrome and bronchopulmonary dysplasia after fetal growth restriction: lessons from a natural experiment in identical twins.	89
<b>Chapter 5:</b> Early structural cardiovascular changes after adverse intrauterine circumstances in identical twins: a cohort study using neonatal cardiac ultrasound.	107
<b>Chapter 6:</b> Changes in structural brain development after selective fetal growth restriction in monochorionic twins.	125
<u>Part III: From infant to adolescent</u>	
<b>Chapter 7:</b> The impact of selective fetal growth restriction or birth weight discordance on long-term neurodevelopment in monochorionic twins: a systematic literature review.	151
<b>Chapter 8:</b> Long-term effects of selective fetal growth restriction (LEMON): a cohort study of neurodevelopmental outcome in growth discordant identical twins in the Netherlands.	167
<b>Chapter 9:</b> Insecure attachment and internalizing behavior problems in birth weight discordant identical twins.	187
<b>Chapter 10:</b> Fetal growth restriction inhibits childhood growth despite catch-up in discordant identical twins.	203

Part IV: Summary and discussion
