The copyright of the published chapters was transferred to the publisher of the journal in which the work has appeared.

Airway epithelial responses to rhinovirus, coronavirus and cigarette smoke

Proefschrift

Ter verkrijging van
de graad van doctor aan de Universiteit Leiden
op gezag van rector magnificus prof.dr.ir. H. Bijl,
volgens besluit van het college voor promoties
te verdedigen op donderdag 26 januari 2023
klokke 10.00 uur

door

Ying Wang

Geboren te Taian, Shandong,

China in 1990

Promotor: Prof.dr. P.S. Hiemstra

Co-promotor: Dr. A.M. van der Does

Leden promotiecommissie: Prof.dr. L.G. Visser

Dr. A. Wack
(The Francis Crick Institute, London, UK)

Dr.ir. M. Kikkert

Prof.dr. H.H. Smits

Prof.dr. L. Uller
(Lund University, Lund, Sweden)

Table of contents

Chapter 1	7
General introduction and outline of the thesis	
Chapter 2	23
Dysregulated mitochondrial metabolism upon cigarette smoke exposure in various human bronchial epithelial cell models Dis Model Mech. 2022 Mar 1;15(3):dmm049247.	
Chapter 3	87
Functional involvement of interferons and metabolism in increased susceptibility to viral infection of cigarette smoke-exposed airway epithelium Submitted	
Chapter 4	125
Tiotropium bromide and fluticasone propionate inhibit rhinovirus-induced mucin production in differentiated airway epithelial cells Front Cell Infect Microbiol. 2020 Jun 19;10:278.	
Chapter 5	155
Impact of changes in epithelial cellular composition and differentiation on SARS-CoV-2 infection biology Published as pre-print on bioRxiv 2021: doi: 10.1101/2021.07.21.453304: submitted to peer-reviewed journal	
Chapter 6	197
SARS-CoV-2 infection of human airway epithelial cell cultures uniquely lacks interferon and immediate early gene responses compared to coronaviruses Submitted	
Chapter 7	229
Summary and general discussion	
Appendix	247
Nederlandse Samenvatting
