First and foremost, I wish to thank my supervisors, Sjef Barbiers and Lisa Cheng. Sjef and Lisa gave me the freedom to explore my own topics and interests, but were always there for guidance, feedback, and encouragement. I am very grateful for their supervision, and for everything I have learned from them.

I am honoured that Doreen Georgi, Marjo van Koppen, Jan-Wouter Zwart, Anikó Lipták, and Jenneke van der Wal agreed to be on my dissertation committee. In 2019, I spent three months as a short-term fellow in Potsdam under Doreen's supervision, which turned out to be a very fruitful and enjoyable period. I always feel inspired after talking with Doreen about linguistics, and I am very grateful to now be part of her research group in Potsdam. Marjo was one of my first syntax teachers in Utrecht, and her work has been extremely influential in my research and for this thesis. The same goes for Jan-Wouter's work, and I am grateful for his generous support of my research. Anikó and Jenneke are among the driving forces that make doing syntax in Leiden a real pleasure, and always made me feel taken seriously as a researcher. I also want to acknowledge their support when I was applying for postdocs.

I was lucky enough to meet and interact with many linguists during my PhD years. This has been hugely beneficial for this thesis and for my development as an academic in general. I wouldn't know where to start or stop mentioning these people by name, so to everyone who was willing to discuss my work in person, online, or over email, sent me their papers, asked a question after a talk, or contributed in some other form: thank you. I truly appreciate it. I also want to sincerely thank my informants. They must have been wondering why I was asking them all these strange questions, but were nevertheless willing to help me as best as they could.

At LUCL, I want to say a big thank you to my PhD colleagues. I always enjoyed the lunches, dinners, and activities together, sharing our work, cultures, and just life in general. Many thanks to Ami, Andrew, Hang, Jiang, Laura, Lis, Menghui, Rasmus, Sarah, and everyone else, for making the days spent in the office such a pleasure. A special thanks goes to my fellow LUCL PhD Council members, who played an important part in making me feel at home in Leiden right from the start.

The highlights of my PhD years are the EGG summer schools and ConSOLE

conferences I attended between 2018 and 2020. Many of the people I met there I consider friends, and the memories of the time we spent together always bring me joy. I hope we will see each other again, be it as linguists or not.

My years in Leiden would not have been the same without Key Town Swing. A big thank you to all the nice dancers for the fun classes, parties, and festivals, and in particular to Ron, for allowing me to get so involved, and for the weekly training sessions that made 2020 so much more bearable. Speaking of 2020, I also enjoyed the cycle rides and beers with András, and the (still regular and fun) chats and long-distance friendship with Matt.

In 2021, I found myself in Berlin and Potsdam again. Moving countries during a pandemic is crazy and I don't think I would have managed without J—thank you for everything. Working in Germany got a lot nicer when I finally met my colleagues in Potsdam, and I always enjoy having lunch, dinner, or just a catch-up with them. They were also kind enough not to ask me about my thesis during the final months of writing, which I am grateful for.

Ik ben heel blij met mijn lieve vriendinnen van de 'schatjes', in het bijzonder Else, Milou, en Lenneke. Bij jullie kan ik altijd helemaal ontsnappen uit de academische bubbel, en dat is soms hard nodig. Ik hoop meer tijd met jullie door te brengen nu mijn proefschrift af is. Tot slot, dankjewel Mama, dat je altijd voor me klaar staat, en dat niets te gek is om mij in Duitsland op te komen zoeken.
