CORRECTION METHODS FOR MEASUREMENT ERROR IN EPIDEMIOLOGIC RESEARCH

Proefschrift

ter verkrijging van
de graad van doctor aan de Universiteit Leiden,
op gezag van rector magnificus prof. dr. ir. H. Bijl,
volgens besluit van het college voor promoties
te verdedigen op donderdag 26 januari 2023
klokke 13:45

door

Linda Nab

geboren te Zutphen
in 1991

Promotor: Prof. dr. R.H.H. Groenwold
Copromotor: Dr. M. van Smeden — Universitair Medisch Centrum Utrecht

Leden promotiecommissie:
Prof. dr. S.C. Cannegieter
Prof. dr. S. le Cessie
Prof. dr. D.L. Oberski — Utrecht Universiteit en Universitair Medisch Centrum Utrecht
Prof. dr. ir. H.C.W. de Vet — Amsterdam Universitair Medisch Centrum

Contents

Contents **v**

1 General introduction and outline of the thesis **1**
1.1 Introduction . . . 1
1.2 Outline . . . 3
References . . . 5

2 Measurement error in continuous endpoints of randomised trials: Problems and solutions **9**
2.1 Introduction . . . 10
2.2 Illustrative example: measurement of haemoglobin levels . . . 10
2.3 Measurement error structures . . . 13
2.4 Correction methods for measurement error in a continuous trial endpoint . . . 14
2.5 Simulation study . . . 15
2.6 Discussion . . . 27
References . . . 30

3 Mecor: An R package for measurement error correction in linear models with a continuous outcome **33**
3.1 Introduction . . . 34
3.2 Measurement error: notation, types and data structures . . . 35
3.3 Measurement error correction . . . 40
3.4 The R package mecor . . . 46
3.5 Examples . . . 49
3.6 Conclusion . . . 60
References . . . 61

4 Regression calibration for measurement error correction: The bias–variance trade off and finite sample performance **67**
4.1 Introduction . . . 68
4.2 Example of lean body mass and energy expenditure . . . 68
4.3 Bias–variance trade off for regression calibration . . . 70
4.4 Finite sample properties of regression calibration . . . 74
4.5 Discussion . . . 82
References . . . 84

5 Sampling strategies for internal validation samples for exposure measurement error correction **87**
5.1 Introduction . . . 88
5.2 Case study: visceral adipose tissue measures as replacement for waist circumference measures . . . 89

5.3 Simulation study . . . 93
5.4 Discussion . . . 104
References . . . 106

6 Guidance for reporting of studies on incidence of venous thromboembolism in COVID-19 patients 109
6.1 Introduction . . . 110
6.2 Methods . . . 110
6.3 Sources of heterogeneity of VTE incidence studies . . . 111
6.4 Discussion . . . 118
References . . . 121

7 Sensitivity analysis for random measurement error using regression calibration and simulation-extrapolation 129
7.1 Introduction . . . 130
7.2 Review and motivating example . . . 131
7.3 Simulation study . . . 133
7.4 Sensitivity analysis in the absence of validation data . . . 142
7.5 Discussion . . . 144
References . . . 149

8 Quantitative bias analysis for a misclassified confounder in marginal structural models 153
8.1 Introduction . . . 154
8.2 Settings and impact of measurement error, notation and assumptions . . . 155
8.3 Quantification of bias due to classification error in a confounding variable . . . 156
8.4 Illustration: quantitative bias analysis . . . 163
8.5 Shiny application: an online tool . . . 164
8.6 Discussion . . . 165
References . . . 167

9 Summary and general discussion 171
9.1 Summary . . . 171
9.2 Discussion . . . 174
References . . . 181

S2 Supplementary material Chapter 2 185
S2.1 Illustrative examples . . . 185
S2.2 Measurement error structures . . . 186
S2.3 Correction methods for measurement error in a continuous trial endpoint . . . 191
S2.4 Measurement error depending on prognostic factors . . . 196
S2.5 Approximation of bias and variance in corrected estimator . . . 196
References . . . 201

S3 Supplementary material Chapter 3 203
S3.1 Variance estimation: standard regression calibration . . . 203
S3.2 Variance estimation: maximum likelihood for replicates studies . . . 205
References . . . 206

S5 Supplementary material Chapter 5 **207**
S5.1 Notation, impact of measurement error and different analysis strategies . . . 207
S5.2 Simulation study parameters . . . 209
S5.3 Simulation study results . . . 209
References . . . 231

S8 Supplementary material Chapter 8 **233**
S8.1 Quantification of bias due to classification error in a confounding variable . . 233
S8.2 Illustration: quantitative bias analysis . . . 240
References . . . 243
