The work described in this thesis was performed at the department of Parasitology at the Leiden University Medical Center, Leiden, the Netherlands, and the department of Microbiology at New York University Langone School of Medicine, New York, USA. The work was supported by the graduate program of the Dutch Research Council (NWO, awarded to H.J.P. van der Zande), and a ZonMw TOP Grant (awarded to dr. B.G.A. Guigas and prof.dr. M. Yazdanbakhsh).

Printing of this thesis was financially supported by Bio X Cell, Chipsoft and Valbiotis, which is gratefully acknowledged.

EXTINGUISHING METAFLAMMATION

Mechanisms and therapeutic opportunities for immunological control of metabolic dysfunctions

Proefschrift

ter verkrijging van

de graad van doctor aan de Universiteit Leiden,

op gezag van rector magnificus prof.dr.ir. H. Bijl,

volgens besluit van het college voor promoties

te verdedigen op donderdag 26 januari 2023

klokke 11.15 uur

door

Hendrik Johannes Petrus van der Zande

geboren te Dordrecht

in 1991

Promotor:	prof.dr. M. Yazdanbakhsh
Co-promotor:	dr. B.G.A. Guigas
Leden promotiecommissie:	prof.dr. P.C.N. Rensen prof.dr. C.L. Scott (VIB Universiteit Gent) dr. P. Loke (National Institutes of Health, Bethesda, MA, USA) dr. J. Van den Bossche (Amsterdam UMC, locatie VUmc)

Table of contents

Chapter 1	General introduction	7
PART 1	**Molecular mechanisms involved in the control of metabolic homeostasis by myeloid cells**	17
Chapter 2	Myeloid ATP citrate lyase regulates macrophage inflammatory responses in vitro without altering inflammatory disease outcomes	19
Chapter 3	Soluble mannose receptor induces proinflammatory macrophage activation and metaflammation	49
Chapter 4	The mannose receptor: from endocytic receptor and biomarker to regulator of (meta)inflammation	101
Chapter 5	LKB1 signaling in dendritic cells controls whole-body metabolic homeostasis by limiting T helper 17 priming	129
PART 2	**IMMUNOMODULATORY (HELMINTH) MOLECULES AND OBESITY-INDUCED METABOLIC DYFSUNCTIONS**	165
Chapter 6	Immune regulation of metabolic homeostasis by helminths and their molecules	167
Chapter 7	The helminth glycoprotein omega-1 improves metabolic homeostasis in obese mice through type-2 immunity-independent inhibition of food intake	195
Chapter 8	Effects of a novel polyphenol-rich plant extract on body composition, inflammation, insulin sensitivity and glucose homeostasis in obese mice	237
Chapter 9	Summarizing discussion and future perspectives	275
Appendices	Nederlandse samenvatting	312
	Curriculum Vitae	324
	List of publications	326
	Dankwoord / acknowledgements	328
