# Intermittency and Number Expansions for Random Interval Maps

Proefschrift

ter verkrijging van  
de graad van doctor aan de Universiteit Leiden,  
op gezag van rector magnificus prof.dr.ir. H. Bijl,  
volgens besluit van het college voor promoties  
te verdedigen op dinsdag 14 februari 2023  
klokke 15:00 uur

door

Benthen Pascal Zeegers  
geboren te Alkmaar  
in 1993

**Promotores:**

Prof. dr. W.Th.F. den Hollander

Prof. dr. E.A. Verbitskiy

(Universiteit Leiden, Rijksuniversiteit Groningen)

**Co-promotor:**

Dr. C.C.C.J. Kalle

**Promotiecommissie:**

Prof. dr. H.J. Hupkes

Prof. dr. F.M. Spieksma

Prof. dr. W. Bahsoun

(Loughborough University)

Dr. C. González-Tokman

(University of Queensland)

Prof. dr. H. Peters

(Universiteit van Amsterdam)

# Contents

<b>1 Introduction</b>	<b>7</b>
§1.1 Motivation and context . . . . .	7
§1.1.1 Statistical properties of critically intermittent systems . . . . .	8
§1.1.2 Extensions of Lochs' Theorem to random systems . . . . .	11
§1.2 Ergodic Theory . . . . .	13
§1.2.1 Invariant measures . . . . .	13
§1.2.2 Mixing and statistical properties . . . . .	16
§1.2.3 Entropy . . . . .	18
§1.3 Interval maps . . . . .	20
§1.4 Random interval maps . . . . .	26
§1.5 Outline of dissertation . . . . .	31
<b>I Statistical Properties of Critically Intermittent Systems</b>	<b>33</b>
<b>2 Absolutely continuous invariant measures for critically intermittent systems</b>	<b>35</b>
§2.1 Introduction . . . . .	36
§2.2 Existence of a $\sigma$ -finite acs measure . . . . .	42
§2.2.1 The induced system and first return time partition . . . . .	42
§2.2.2 Properties of the induced transformation . . . . .	45
§2.2.3 Proof of Theorem 2.1.2 . . . . .	50
§2.3 Estimates on the acs measure . . . . .	52
§2.3.1 The case $\theta \geq 1$ . . . . .	52
§2.3.2 The case $\theta < 1$ . . . . .	54
§2.4 Further results and final remarks . . . . .	62
§2.4.1 Proof of Corollaries 2.1.4 and 2.1.5 . . . . .	62
§2.4.2 The non-superattracting case . . . . .	64
§2.4.3 Final remarks . . . . .	67
<b>3 Decay of correlations for critically intermittent systems</b>	<b>69</b>
§3.1 Introduction . . . . .	70
§3.2 Preliminaries . . . . .	74
§3.2.1 Properties of good and bad maps . . . . .	74
§3.2.2 Young towers . . . . .	76

§3.3	Inducing the random map on $(\frac{1}{2}, \frac{3}{4})$ . . . . .	78
§3.3.1	The induced system . . . . .	78
§3.3.2	Estimates on the first return time . . . . .	80
§3.3.3	Estimates on the induced map . . . . .	86
§3.4	A Young tower for the random map . . . . .	89
§3.4.1	The acs probability measure . . . . .	89
§3.4.2	Decay of correlations . . . . .	92
§3.5	Further results and final remarks . . . . .	96
<b>4</b>	<b>Intermittency generated by attracting and weakly repelling fixed points</b>	<b>99</b>
§4.1	Introduction . . . . .	100
§4.2	Phase transition for the acs measure . . . . .	104
§4.2.1	The case $\eta > 1$ . . . . .	104
§4.2.2	The case $\eta < 1$ . . . . .	107
§4.3	Final remarks . . . . .	115
<b>II</b>	<b>Extensions of Lochs' Theorem to Random Systems</b>	<b>117</b>
<b>5</b>	<b>A Lochs Theorem for random interval maps</b>	<b>119</b>
§5.1	Introduction . . . . .	120
§5.1.1	Extension of Lochs' Theorem to number theoretic fibered maps	120
§5.1.2	Number expansions generated by random interval maps . . . . .	123
§5.1.3	Main results . . . . .	125
§5.2	Random number systems . . . . .	127
§5.3	A special case . . . . .	129
§5.4	Invertible base maps and invariant measures . . . . .	133
§5.5	Fiber entropy . . . . .	135
§5.6	Proofs of the main results . . . . .	138
§5.6.1	Asymptotic size of cylinder sets . . . . .	138
§5.6.2	The Random Rokhlin Formula . . . . .	139
§5.6.3	The Central Limit Theorem . . . . .	142
§5.7	Examples involving well-known number expansions . . . . .	150
<b>6</b>	<b>A Lochs Theorem for pseudo-random number generation with <math>\beta</math>-encoders</b>	<b>159</b>
§6.1	Introduction . . . . .	160
§6.2	Preliminaries . . . . .	162
§6.3	Proofs of the main results . . . . .	164
§6.4	Final remarks . . . . .	167
<b>Bibliography</b>		<b>169</b>
<b>Samenvatting</b>		<b>179</b>

<b>Acknowledgements</b>	<b>183</b>
<b>Curriculum Vitae</b>	<b>185</b>
