De vervaardiging van dit proefschrift is mede mogelijk gemaakt door het project “Persia and Babylonia: Creating a New Context for Understanding the Emergence of the First World Empire,” gefinancierd door de European Research Council (ERC), en het project “Vigilanzkulturen,” gefinancierd door de Deutsche Forschungsgemeinschaft (DFG). Het omslag is ontworpen door het UFB Grafisch Centrum; de afbeelding is afkomstig van het Metropolitan Museum of Art en geeft een Perzische cylinderzegel weer (no. 1999.325.114).

Acknowledgements

A large number of people have contributed to the realization of the present PhD thesis, both in and outside of the Netherlands. The following is a humble attempt to express my gratitude to them. The first people whom I would like to thank are Jason Silverman and Melanie Wasmuth (Helsinki University), who made me fall in love with the Persian Empire and with Achaemenid Egypt when I was still a BA student. Not long thereafter, Olaf Kaper (Leiden University) suggested that I study the Egyptian rebellions of the Persian Period for my MA thesis. The rebellions had fascinated me for a long time, and I was more than happy to dive into the subject matter more deeply. I am grateful to Olaf for his encouragement and feedback over the years, and for his own contributions on the subject of Egyptian resistance. When I had completed my MA, Caroline Waerzeggers (Leiden University) encouraged me to pursue my research of rebellions in the Persian Empire as a PhD student. After a year outside of academia, I began my PhD trajectory in her ERC project “Persia and Babylonia: Creating a New Context for Understanding the Emergence of the First World Empire.” I am extremely grateful for the research opportunity that Caroline provided me, and for her guidance and supervision over the years. Others that have been instrumental during my period as a PhD student include Joachim Quack (Heidelberg University), for his invaluable feedback, Holger Gzella (Ludwig-Maximilian University of Munich), for his encouragement and inspiration, Damien Agut-Labordère (French National Centre for Scientific Research), for graciously introducing me to the world of Ayn Manawir, and Karen Radner and Alexander Schütze (Ludwig-Maximilian University of Munich), for their heartfelt welcome during my sixth-month stay at Munich. In addition, I would like to thank Melanie Gross and Maarja Seire, for making my stay at Leiden as “gezellig” as possible, Yazdan Safaee, for sharing his inexhaustible digital library with me, and Leila Makvandi, for hosting our travel party in Iran and for graciously showing Ivo Martins and me around in Kashan. Last, but certainly not least, I would like to thank my parents, Maria Meulenbeek and Pieter Wijnsma, for their never-ending love and support, Kioa Wijnsma, Ties IJzermans, Lucca and Mirre, for providing some much-needed sunshine in my life, and Louise Prins, for always standing by my side, even when I was hard to be around. To all of them and many more people who are not identified by name in the preceding lines: thank you.
