Contents

Chapter 1	Introduction	7
<i>Part I</i>	<i>Prediction of Rheumatoid Arthritis</i>	
Chapter 2	Difficulties making a fist in clinically suspect arthralgia; an easy applicable phenomenon predictive for RA that is related to flexor tenosynovitis	23
Chapter 3	The value of the squeeze test for detection of subclinical synovitis in patients with arthralgia suspicious for progression to RA	39
Chapter 4	Subclinical synovitis in arthralgia: how often does it result in clinical arthritis? Reflecting on starting points for disease-modifying anti-rheumatic drug treatment	55
Chapter 5	Do magnetic resonance imaging-detected erosions predict progression to rheumatoid arthritis in patients presenting with clinically suspect arthralgia? A longitudinal study	79
<i>Part II</i>	<i>Pathogenesis of Rheumatoid Arthritis</i>	
Chapter 6	Do autoantibody-responses mature between presentation with arthralgia suspicious for progression to rheumatoid arthritis and development of clinically apparent inflammatory arthritis? A longitudinal serological study	107
Chapter 7	Determining in which pre-arthritis stage HLA-shared epitope alleles and smoking exert their effect on the development of rheumatoid arthritis	131
Chapter 8	Summary and discussion	171
Chapter 9	Nederlandse samenvatting	189
Appendices	Curriculum Vitae	201
	List of publications	203
	Dankwoord	207
