The research described in this thesis was supported with expertise, data en guidance by LUMC-Curium, centre for child and adolescent psychiatry – with a research focus on detection and treatment of complex psychiatric problems in youth, by the former research profile area Health, Prevention and the Human Life cycle of Leiden University, and the Leiden University Medical Centre societal outreach programme Population Health.

**“Kindness is more important than wisdom,
and the recognition of this is the beginning of wisdom.”**

Theodore Isaac Rubin

TABLE OF CONTENTS

Chapter 1	
General introduction	11
Reference list General introduction	24
Chapter 2	
Recognition of anxiety disorders in children: a cross-sectional vignette-based survey among general practitioners	31
Reference list Study 1	48
Chapter 3	
Informative value of referral letters from general practice for child and adolescent mental healthcare	55
Reference list Study 2	77
Chapter 4	
The diagnostic process from primary care to child and adolescent mental healthcare services: The incremental value of information conveyed through referral letters, screening questionnaires and structured multi-informant assessment.	83
Reference list Study 3	99
Chapter 5	
General discussion	105
Summary of findings	106
Clinical implications and practical value	110
Conclusion	119
Appendices	
Supplementary material Study 1	125
Supplementary material Study 2	130
Supplementary material Study 3	136
Nederlandstalige samenvatting	
Tussen kijken en zien: Herkennen, verwijzen en evalueren van psychosociale problematiek bij jeugdigen in de eerstelijnszorg en de geestelijke gezondheidszorg	140
Acknowledgements	150
Curriculum vitae	151
