Acknowledgments

This PhD project would not have come to fruition without the help of many brilliant people. My deepest gratitude goes to my supervisors Arie Verhagen and Jenny Audring, who were open to meeting a Japanese student studying in Bonn who had a vague idea of writing a dissertation on posture verbs in Dutch and German. The fact that you were positive about accepting me as a PhD candidate at LUCL changed the following years of my life in a delightful and wonderful way. Arie enlightened me about how language emerges and evolves, which impacted how I thought about language change and gave rise to the framework of this research. I am endlessly thankful to Jenny, who constantly needed to stop me from writing *Historical adventures of posture verbs* and who read the manuscript thoroughly many times. Without your dedication, constant support, and constructive comments and suggestions, this work would never have been finished.

As my life as a PhD candidate originally began in Kyoto, Japan, I would like to take this opportunity to thank not only my then-supervisor Yasushi Kawasaki, but also my fellow Germanist(inn)en there: Eriko Nakano, Yumiko Hirai, Yuta Daigi, Takashi Uemura, Anja M. Collazo, and Nami Komoda. Further thanks go to my colleagues at LUCL — my PhD Council colleagues, my office-mates and my lunch-mates — who made my work and life in Leiden so enjoyable. Andrew, Astrid, Cesko, Jiang, Han, Hang, Laura, Liz, Menghui, Qing, Rasmus, Sarah, Tingting, Yunus, and Zhen: it was always a pleasure to work, eat, drink, or just chit-chat with you all. I have also benefited greatly from our discussions and I hope that I can be of help to you too, whenever you need me.

I owe special thanks to Niels and Loesinè for checking and revising my writing in Modern Dutch. You were so patient with my broken Dutch, and with all my (mostly silly) how-and-why questions about the language. Tanja Simons was the first person to teach me how to read Middle and Early Modern Dutch, and she also helped me interpret and translate Middle and Early Modern Dutch texts. Maaïke Beliën included me in her discussion group, which gave me a chance to broaden my knowledge on various linguistic topics. Gijsbert Rutten generously allowed me to attend his lecture on Dutch historical linguistics, which deepened my knowledge of the linguistic history of Dutch. As an English proofreader, Elly Dutton patiently transformed my messy writing into academic reading. To these people, I owe a debt of gratitude.

Outside of LUCL, Lut Colman and Carole Tiberius provided me an invaluable opportunity to utilize my expertise as a corpus linguist for the project *Woordcombinaties* and to work in the beautiful offices of the Dutch Language Institute (*Instituut voor de Nederlandse Taal*) on the Rapenburg in Leiden. I am blessed to have Sara Arndt and Yuri Oyama as friends as well as fellow linguists; they have been a source of strength and inspiration during these years. Last but not least, I am especially thankful to my family, who spared no effort in helping and supporting me in whichever way I needed, even though they have almost no idea what my research project is about.
