Hacking stroke in women

Towards aetiology-driven precision prevention

PROEFSCHRIFT

ter verkrijging van
de graad van doctor aan de Universiteit Leiden,
op gezag van rector magnificus prof. dr. ir. H. Bijl,
volgens besluit van het college voor promoties
te verdedigen op dinsdag 7 maart 2023
klokke 16:15 uur

door

Hendrikus Johannes Alphonsius van Os
geboren te Nieuwkoop
in 1992

The research presented in this thesis was performed at the Department of Neurology, the Department of Clinical Epidemiology, the National eHealth Living Lab, and the Department of Public Health and Primary Care of the Leiden University Medical Center, Leiden, The Netherlands.

The research in this thesis was supported by a personal Dekker Junior Clinical Scientist Grant (2018T082) and the Innovation Grant including the results of a crowdfunding campaign (2018T016) from the Dutch Heart Foundation, and a ZonMw Gender & Prevention Grant (555003014).

ISBN: 978-94-6473-032-6

Cover by Guillaume Melessen

Financial support by the Dutch Heart Foundation for the publication of this thesis is gratefully acknowledged.

Promotiecommissie

Promotores: Prof. dr. M. J. H. Wermer
Prof. dr. M. D. Ferrari

Copromotor: Dr. T. N. Bonten

Overige leden: Prof. dr. N. H. Chavannes
Dr. H. M. M. Vos
Prof. dr. R. M. C. Herings, department of Epidemiology and Data
Science, Amsterdam UMC, location VUmc
Dr. M. C. Visser, department of Neurology, Amsterdam UMC, location
VUmc

Contents

Chapter 1.	General introduction	1
Part I. Pathophysiology of stroke in women		
Chapter 2	Migraine and cerebrovascular atherosclerosis in patients with ischemic stroke. <i>Stroke. 2017;48:1973-1975</i>	19
Chapter 3	Sex differences in intracranial and extracranial atherosclerosis in patients with acute ischemic stroke. <i>Int J Stroke. 2021;16:385-391</i>	27
Chapter 4	Intrinsic Coagulation Pathway, History of Headache, and Risk of Ischemic Stroke. <i>Stroke. 2019;50:2181-2186</i>	39
Chapter 5	Delayed cerebral ischemia after aneurysmal subarachnoid hemorrhage in patients with a history of migraine. <i>Stroke. 2020;51:3039-3044</i>	55
Chapter 6	Delayed cerebral ischemia after aneurysmal subarachnoid hemorrhage in young patients with a history of migraine. <i>Stroke. 2022:101161</i>	67
Chapter 7	Risk of ischemic stroke in women with migraine and hormonal contraceptives: case-control study and meta-analysis. <i>Submitted</i>	75
Chapter 8	Dutch Parelsnoer Institute-Cerebrovascular accident (CVA) Study: a large standardized multicenter clinical biobank. <i>Open Journal of Bioresources. 2018; 5, p.8</i>	95
Chapter 9	Sex differences in risk profile, stroke cause and outcome in ischemic stroke patients with and without migraine. <i>Front Neurosci. 2021;15:740639</i>	111
Chapter 10	Sex differences in presentation of stroke: A systematic review and meta-analysis. <i>Stroke. 2022;53:345-354</i>	121
Chapter 11	Role of atherosclerosis, clot extent, and penumbra volume in headache during ischemic stroke. <i>Neurology. 2016 Sep 13;87(11)</i>	141

Part II. Prediction of the risk of stroke in women

Chapter 12	Developing clinical prediction models using primary care electronic health record data: The impact of data preparation choices on model performance. <i>Frontiers in Epidemiology. 2022;2</i>	162
Chapter 13	Predicting outcome of intraarterial treatment for acute ischemic stroke using machine learning algorithms. <i>Front in Neurol. 2018; 9:784</i>	180
Chapter 14	The added value of women-specific and psychosocial risk factors For prediction of stroke in women under 50 years in the general population. <i>Under revision at Neurology</i>	198
Chapter 15	First-ever cardiovascular event prediction in patients under 50 years using complex data-driven models on routine care data. <i>Under revision at J American Heart Association</i>	220
Chapter 16	General discussion	235
Chapter 17	Summary	260
Chapter 18	Nederlandse samenvatting	266
	List of publications	275
	Appendices to all chapters	278
	Curriculum vitae	279
	Dankwoord	280
