Modulating energy metabolism - Pathophysiological aspects and novel interventions
© 2023, Maaïke Eva Straat

The work described in this thesis was performed at the department of Medicine, division of Endocrinology, Leiden University Medical Center, Leiden, The Netherlands, and at the Einthoven Laboratory for Experimental Vascular Medicine, Leiden, The Netherlands.

The research described in this thesis was supported by a grant of the Dutch Heart Foundation (CVON2017 GENIUS-2).

Financial support by the Dutch Heart Foundation for the publication of this thesis is gratefully acknowledged. The printing of this thesis was furthermore financially supported by ChipSoft.

Cover design and layout: Marilou Maes, www.persoonlijkproefschrift.nl
Printing: Ridderprint, www.ridderprint.nl
ISBN: 978-94-6458-931-3

All rights are reserved. No part of this thesis may be reproduced, stored or transmitted in any form or by any means without permission in writing from the author.

Modulating energy metabolism

Pathophysiological aspects and novel interventions

Proefschrift

ter verkrijging van
de graad van doctor aan de Universiteit Leiden,
op gezag van rector magnificus prof.dr.ir. H. Bijl,
volgens besluit van het college voor promoties
te verdedigen op donderdag 16 maart 2023
klokke 11:15 uur

door

Maaïke Eva Straat

geboren te Nijmegen

in 1993

Promotor Prof. dr. P.C.N. Rensen

Copromotoren Dr. M.R. Boon
Dr. B. Martinez-Tellez

Leden promotiecommissie Prof. dr. M. Yazdanbakhsh
Prof. dr. H. Pijl
Dr. J.E. Roeters van Lennep (Erasmus MC, Rotterdam)
Dr. Kirsi Virtanen (University of Turku, Turku, Finland)

TABLE OF CONTENTS

Chapter 1	General introduction and outline of this thesis	7
Part 1	Pathophysiological aspects of cardiometabolic diseases	
Chapter 2	Comprehensive (apo)lipoprotein profiling in patients with genetic hypertriglyceridemia using LC-MS and NMR spectroscopy	35
Chapter 3	Differences in inflammatory pathways between Dutch South Asians versus Dutch Europids with type 2 diabetes	59
Chapter 4	Role of brown adipose tissue in adiposity associated with narcolepsy type 1	87
Part 2	Physiological effects of cold exposure and activation of brown adipose tissue	
Chapter 5	The effect of cold exposure on circulating transcript levels of immune genes in Dutch South Asian and Dutch Europid men	115
Chapter 6	Cold exposure induces dynamic changes in circulating triacylglycerol species which is dependent on intracellular lipolysis: a randomized cross-over trial	151
Chapter 7	Circadian control of brown adipose tissue	181
Chapter 8	Cold-induced thermogenesis shows a diurnal variation that unfolds differently in males and females	209
Chapter 9	Stimulation of the beta-2-adrenergic receptor with salbutamol activates human brown adipose tissue	237
Chapter 10	General discussion and future perspectives	261
Chapter 11	Appendices	229
	Summary	300
	Nederlandse samenvatting	306
	List of publications	314
	Curriculum vitae	317
	Dankwoord	318
