TABLE OF CONTENTS

Part one	Overview	11
	General introduction and scope of the thesis	13
Chapter 1	Epidemiology and management of fetal and neonatal alloimmune thrombocytopenia	23
Part two	Natural history of HPA-1a mediated FNAIT	43
Chapter 2	HIP (HPA-screening in pregnancy) study: protocol of a nationwide, prospective and observational study to assess incidence and natural history of fetal/neonatal alloimmune thrombocytopenia and identifying pregnancies at risk	45
Chapter 3	The natural history of human platelet antigen (HPA)-1a alloimmunised pregnancies: a prospective observational cohort study	63
Chapter 4	Placental complement activation in fetal and neonatal alloimmune thrombocytopenia: an observational study	99
Part three	Clinical relevance of HPA-5b antibodies	123
Chapter 5	Clinical characteristics of human platelet antigen (HPA)-1a and HPA-5b alloimmunised pregnancies and the association between platelet HPA-5b antibodies and symptomatic fetal neonatal alloimmune thrombocytopenia	125
Part four	Neonatal management	145
Chapter 6	Postnatal treatment for children with fetal and neonatal alloimmune thrombocytopenia: a multicentre, retrospective cohort study	147
Part five	Long-term outcome	177
Chapter 7	Children newly diagnosed with fetal and neonatal alloimmune thrombocytopenia: neurodevelopmental outcome at school age	179
Chapter 8	Long-term neurodevelopmental outcome in children after antenatal intravenous immunoglobulin treatment in fetal and neonatal alloimmune thrombocytopenia	199
Part six	Cost effectiveness	219
Chapter 9	Cost-utility analysis of screening of pregnant women for fetal neonatal alloimmune thrombocytopenia	221

Part seven	Summary and discussion	247
Chapter 10	General discussion and future perspectives	249
	Summary	287
	Nederlandse samenvatting	293
Appendices	List of abbreviations	303
	List of publications	307
	Curriculum vitae	311
	Dankwoord	313
