Thanks to the vision by Royal Netherlands Army to invest in officer-scholars, I was able to fulfil my long-cherished dream to pursue a PhD on a military topic. For this I am indebted to Professor Dr brigadier-general Paul Ducheine who has been a tireless advocate of this program and continues to serve as a patron for the academically minded army officers. Special thanks are owed to Dr lieutenant-colonel Mirjam Grandia Mantas who blazed the trail for officer-scholars in the army. At the end of my research, I am excited to discover the opportunities this experience yields in the rest of my career and apply my acquired knowledge for the benefit of the organization.

Naturally, I want to express my gratitude to my supervisors: Professor Dr air commodore Frans Osinga and Professor Dr Martijn Kitzen. Frans has encouraged me to explore the fields of military innovation and organizational learning. Martijn enticed me to exploit my prior knowledge for this research and acted as a mentor for my venture into academia and its culture.

At the start of my research, I envisioned this to be a largely solitary endeavor. I was both right and wrong. To be sure, chasing sources, analyzing data and writing a coherent dissertation have been my own responsibility, as are any remaining mistakes in the text. Still, I found that help from colleagues at the Faculty of Military Sciences of the Netherlands Defence Academy has been indispensable in attaining the final results of my research, both through advice, profound conversations and more social talks. In general, I would like to thank my colleagues from the War Studies department for their support. Dr Erik de Waard has commented on early drafts of my work and broadened my scientific horizon through a multidisciplinary approach. Lieutenant-colonel Dr Rob Sinterniklaas has dispensed valuable advice on the travails of attaining a PhD as an officer and made a valuable contribution in my understanding of the field of military innovation. Captain (R) Lysanne Leeuwenburg provided valuable assistance during joint interviews. Above all, I want to thank major Ivor Wiltenburg. Throughout our PhD-research you have always been a tremendous support and our time together at the faculty is a highlight of my career. I am proud to call you a great friend and grateful that you and Erik are with me during the defence ceremony.

Beyond the NLDA, various scholars generously shared their wisdom with me and so helped me refine my line of inquiry. In no particular order I would like to thank Dr Wout Broekema, Dr Rhys Crawley, Dr James Derleth, Dr Adam Grissom, Dr Frank Hoffman, Professor Dr James Kiras, Dr Daniel Marston, Dr Kathleen McInnis, Dr Tim Sweijs and Dr Alex Waterman for their time, insights and introductions.

Of course, I am indebted to the numerous service members, civil servants and scholars who indulged my curiosity and shared their insights candidly in interviews. Their experience and knowledge on the war in Afghanistan have been invaluable to my research. For my foray in the British campaign in Helmand, I was fortunate that I was supported by the British Army's Land Warfare Centre in Warminster. In particular I would like to thank major Don Oldcorn and lieutenant-colonel Dave Allen.

For the resulting volume I am most grateful to Dr John Tull, who has generously edited the manuscript and provided insightful comments. Furthermore, during our conversations John's perspective on organizational learning has stoked my interest in this field even further. The beautiful maps in this book have been crafted by Erik van Oosten from the Netherlands Institute for Military History. My sincere thanks to Erik and Dr Erwin van Loo for making this possible. Further thanks are owed to Laura Elshof and Marcel Groenhuis of the NLDA for their assistance in the publication process.

The completion of my dissertation would not have been possible without the unwavering support and love of my wife Lieke and our sons Luc and Thomas. I am grateful to Lieke for the time I could spend beyond office hours to attend conferences, read new sources or tinker with the text. The ability to successfully combine work with family life originates with my own upbringing. My brother Arno has always shared the curiosity to understand how the world works and has been supportive throughout my career. Finally, I am most indebted to my parents Rien and Nel who provided a solid and loving foundation through their support, encouraged my ambitions and instilled a general sense of curiosity. This book is dedicated to you.

Curriculum Vitae

Curriculum Vitae

Martijn van der Vorm (Delft, 20 April 1982) acquired his secondary education at Christelijk Lyceum Zandvliet in The Hague (1994-1999). He was awarded his propaedeutic diploma in Information Management at the Haagse Hogeschool (2000-2001). He studied history at Leiden University between 2001-2005, obtaining a Master of Arts degree. In 2005 he joined the Royal Military Academy as a cadet in the post-academic track, graduating in 2007. Since then he serves as an officer in the Royal Netherlands Army in various positions. Martijn has been deployed four times on operational tours to Afghanistan and the Middle East. Between 2016 and 2019, he attended the Military Strategic Studies program at the Netherlands Defence Academy, obtaining a Master of Arts degree. He has published scholarly works on Special Operations Forces, irregular warfare and organizational learning in armed forces.
