Acknowledgments

First and foremost, I want to thank Dr. Michaël Peyrot, who started this project, and gave me the chance and opportunity to work in academia for the first time, and was there at every single step of writing my thesis and also, often, of my life. Alongside Michaël, I want to thank Dr. Federico Dragoni, who also worked in the same project: we worked together many, many times, and he also provided many comments and corrections to this thesis. A number of ideas that arose throughout the years are due to our collaboration, and my work would be much more incomplete without his. I thank Prof. Lubotsky for teaching me, for his patience, for his time, for his advice.

I also want to thank Dr. Xander Vertegaal for being my colleague, then my friend, then my paranymph. It is difficult for a foreigner to feel warmth and familiarity in a foreign land with such a different culture, yet Xander, and his mother Cécile, whom I thank equally, opened their door and their hearts for me. Boxmeer will always remain a special place in my heart. Kate Bellamy, thank you so much. Words cannot tell how grateful I am, and certainly I would not have been able to accomplish half of what I did without Dr. Bellamy's presence and support throughout the years. Thank you for having proofread my English so often. Thank you for being my colleague, my closest friend, my partner, and then my friend again. Stefan Norbruis, Louise Friis, Aljoša Šorgo, thank you for endless discussions at the office, the restaurants, the bars, and at the bars again. Niels Schoubben, thank you so much for your feedback. I thank the Semitic bros: Drs. Marijn van Putten, Benjamin(pjes) Suchard, Fokelien Kootstra, for being such good and helpful friends as well as such interesting colleagues. They have rekindled my love for Semitic linguistics and supported me whenever I needed them.

To my French friends too I owe so much, both scientifically and personally, in particular Dr. Romain Garnier and Philippe Hattat, with whom I feel like the three fingers of the hand. Thanks to our conversations, I could improve many ideas, even borrow some, and get the mental energy to continue through hard times. Thanks also to Vincent van Strien, Maxime Canin, le tout petit k, and Dr. Benoît Sagot. Dear Athanaric Huard, thank you for being my friend, for those more or less sober evenings spent talking about Tocharian and less Tocharian issues, and thank you in particular for helping me

so much with so many Tocharian words. Your knowledge of Tocharian texts and your readiness to help are precious to me and to all the community. Very special thanks go to my master, my professor Georges-Jean Pinault, for teaching me, giving me enough passion to continue, supporting me, taking time to answer my questions and to discuss issues, for reading my thesis, and encouraging me. Without him, none of this would have been possible.

My Iranian friends were always there to help and support me, and provide me with examples, translations, and warmth. In particular I thank my dear Farzaneh Qarehi, Niloufar Rashedi, Mahnaz Namazi, Noushin Shafiee, Nas-taran Sadighi, Milad Abedi, Arya Javanmardi, Vesta, Maryam, Parichehr and Saharshid and Armaity, Alexander, Behnam, (Pash!), and dearest Helia.

Two Iranologists have had, and continue to have, a very special place in my scientific and personal life, and I want to thank them for the infinite time and effort they have given me. One is Prof. Dr. Agnes Korn, who opened my eyes to so many questions and realities of Iranian linguistics, and opened her house and her heart to me so often. The other is Dr. Johnny Cheung, my dear friend, who has helped me scientifically, but also personally, and showed me the colour of friendship in the hardest moments. Both have transformed my scientific and personal vision on so many issues.

A heartfelt thank you also to Dr. Alessandro Del Tomba – meeting you was an amazing surprise, and I am proud and happy of being your friend. To Juan Briceño Villalobos and Carmen, I wish you all the best. Dear M. Éric Blaisse, thank you for lighting my passion for etymology.

My dear parents I thank from the utmost depth of my heart for providing me love, tenderness, support, and even money, whenever I needed them. Leïla and Gilles Bernard, my dearest ones, thank you. Words cannot tell what I think and feel, but this work is also yours (except the shortcomings!).

The “real” list is much longer, so to all those I could not thank for lack of space, you do know that you are firmly in my heart. I thank the members of my reading committee for reading my thesis so carefully: Profs. Gabrielle van den Berg, Georges-Jean Pinault, Ron Kim and Dr. Alwin Kloekhorst.

Finally, I want to mention as an homage those dear to me who have departed in these past five years. I cannot and will not forget them, and their presence as well as their absence has been very important to me. Adrien, mon tendre ami, Sohrab, Ommi Yagouta and Mamé, mes chères, chères grand-mères, and Doris. “به مستان نوید سرودی فرست / به یاران رفته درودی فرست”

– Chams Benoît Bernard.
