Treatment optimisation and pharmacogenetics of systemic and intraperitoneal chemotherapy in colorectal cancer

Emma Hulshof

The research presented in this thesis was performed at Leiden University Medical Center, Leiden, the Netherlands and at Catharina Hospital, Eindhoven, the Netherlands.

Financial support for the publication of this thesis was provided by Afdelingsfonds Klinische Farmacie & Toxicologie and Uitgeverij Jaap.

dr. G.J. Liefers

prof. dr. A.H.J. Mathijssen, Erasmus MC Rotterdam

CONTENTS

Chapter 1	General introduction	7
<hr/>		
PART I: Implementation of <i>UGT1A1</i> genotype-guided dosing of irinotecan		
Chapter 2	Pre-therapeutic <i>UGT1A1</i> genotyping to reduce the risk of irinotecan-induced severe toxicity: Ready for prime time European Journal of Cancer 2020;141:9–20	17
Chapter 3	Dutch Pharmacogenetics Working Group (DPWG) guideline for the gene–drug interaction between <i>UGT1A1</i> and irinotecan European Journal of Human Genetics 2022; Nov. 28	43
Chapter 4	<i>UGT1A1</i> genotype-guided dosing of irinotecan: A prospective safety and cost analysis in poor metaboliser patients European Journal of Cancer 2022;162:148–57	125
<hr/>		
PART II: Discovery and validation of genetic biomarkers for hyperthermic intraperitoneal chemotherapy (HIPEC)		
Chapter 5	Genetic variants in DNA repair pathways as potential biomarkers in predicting treatment outcome of intraperitoneal chemotherapy in patients with colorectal peritoneal metastasis: A systematic review Frontiers in Pharmacology 2020;11:577968	159
Chapter 6	Genome-wide association study for predictors of survival after cytoreductive surgery and hyperthermic intraperitoneal chemotherapy in patients with colorectal peritoneal metastases In preparation	209
Chapter 7	Identification of pharmacogenetic biomarkers for efficacy of cytoreductive surgery plus hyperthermic intraperitoneal mitomycin C in patients with colorectal peritoneal metastases European Journal of Surgical Oncology 2020;46(10):1925–30	229
Chapter 8	General discussion	247
<hr/>
