THE BATTLE AGAINST ANTIMICROBIAL RESISTANT BACTERIAL INFECTIONS

Next stage development of antimicrobial peptides

Miriam E. van Gent

Colofon

The research presented in this thesis was conducted at the Department of Infectious Diseases, Leiden University Medical Center, Leiden, the Netherlands.

The work presented in this thesis was financially supported by the Dutch Research Council (NWO), Novel Antibacterial Compounds and Therapies Antagonizing Resistance Program: grant number 16434.

ISBN: 978-94-6419-782-2

Cover illustration: The game of chess represents the ongoing battle between medical scientists and bacteria. The work presented in this thesis is one move that puts the bacteria in check. However, bacteria will have the opportunity to counteract this move.

Cover design: Miriam E. van Gent

Lay-out: Miriam E. van Gent

THE BATTLE AGAINST ANTIMICROBIAL RESISTANT BACTERIAL INFECTIONS

Next stage development of antimicrobial peptides

Proefschrift

ter verkrijging van
de graad van doctor aan de Universiteit Leiden,
op gezag van rector magnificus prof. dr. ir. H. Bijl,
volgens besluit van het college voor promoties
te verdedigen op dinsdag 30 mei 2023
klokke 10:00 uur

door

Miriam Elise van Gent
geboren te Venlo
in 1993

Promotor

Prof. dr. L.G. Visser

Co-promotor

dr. P.H. Nibbering

Thesis committee

Prof. dr. P.S. Hiemstra

Prof. dr. H.A. Santos (University Medical Center Groningen)

Prof. dr. H.M. Nielsen (University of Copenhagen)

dr. J. Dorin (University of Edinburgh)

“Het geheel is meer dan de som der delen.”

Aristoteles (384-322 v. Chr.)

Contents

Chapter 1	General introduction	9
Chapter 2	C-terminal PEGylation improves SAAP-148 peptide's immunomodulatory activities	27
Chapter 3	Synergism between the synthetic antibacterial and antibiofilm peptide (SAAP)-148 and halicin	53
Chapter 4	Current advances in lipid and polymeric antimicrobial peptide delivery systems and coatings for the prevention and treatment of bacterial infections	77
Chapter 5	Encapsulation into hyaluronic acid-based nanogels improves the selectivity index of the snake cathelicidin Ab-Cath	135
Chapter 6	Encapsulation of SAAP-148 in octenyl succinic anhydride-modified hyaluronic acid nanogels for treatment of skin wound infections	161
Chapter 7	Summary and general discussion	193
Appendix	Nederlandse samenvatting	213
	List of abbreviations	219
	Training program	222
	List of publications	224
	Curriculum Vitae	225
	Dankwoord	226
