**Tailored treatment for
colon and rectal cancer**

Renu R. Bahadoer

Cover: original drawing by Ajmal Farid

The cover represents the treatment path that patients follow in modern-day medicine. There is no longer 'one right' treatment. Nowadays there are various treatment options, when possible based on the patients preferences - a tailored treatment.

If you leaf through the book you will also see that the people on the cover continue their path.

The cover also presents my own journey the past few years. I am very proud of the end result (my dissertation) but also grateful for the journey and for everything I have learnt along the way.
