TABLE OF CONTENTS

Chapter 1	General introduction and outline	7
Chapter 2	Perspectives on treatment of inflammatory bowel disease in older patients: applying gut feeling in an evidence-based era? <i>EMJ Gastroenterology 2022</i>	15
Chapter 3	Systematic review: components of a comprehensive geriatric assessment in inflammatory bowel disease – a potentially promising but often neglected risk stratification <i>Journal of Crohn's and Colitis 2019</i>	37
Chapter 4	Anti-tumor necrosis factor therapy in patients with inflammatory bowel disease: comorbidity, not patient age, is a predictor of severe adverse events <i>International Journal of Colorectal Disease 2020</i>	85
Chapter 5	Comorbidity, not patient age, is associated with impaired safety outcomes in vedolizumab- and ustekinumab-treated patients with inflammatory bowel disease <i>Alimentary Pharmacology and Therapeutics 2020</i>	115
Chapter 6	Deficits in geriatric assessment associate with disease activity and burden in older patients with inflammatory bowel disease <i>Clinical Gastroenterology and Hepatology 2021</i>	145
Chapter 7	Frailty associates with hospitalization and decline in quality of life and functional status in older patients with inflammatory bowel disease <i>Submitted</i>	167
Chapter 8	Summarizing discussion	197
Appendix	Nederlandse samenvatting	206
	English summary	212
	List of publications	218
	Curriculum vitae	220
	Dankwoord	222
