## Acknowledgements

To my supervisors, Pablo Mendes de Leon, Steven Truxal, and Robert Heinsch, thank you for giving me the opportunity to undertake this project and for your guidance and support along the way. I very much appreciated your support and guidance along the way as I struggled through many phases to complete this project.

Thank you to others who took the time to share their knowledge, read my work and discuss and challenge my ideas. I will forever be grateful for the invaluable assistance, in particular Jiefang Huang, for allowing me to undertake the research at ICAO. Thank you also Tanja Masson-Zwaan, Mia Wouters, Roderick van Dam, Julian Rotter, Peter Haanappel, and Daqun Liu, for your aid and insight in the early days.

I am lucky to have met colleagues and friends Dejian Kong, Lain Kovudhikulrungsri, Xiaoxi Sun, Hui Liu, Ed Batista, Annemarie Schuite, Dimitra Stefoudi, Leah Powell, and Zhuang Tian for making my study at Leiden such an enjoyable memory. Thank you very much, Hilkje Wijnmaalen and Natascha Meewisse, for your assistance in navigating through the procedural process. Thank you also to Paula, who I believe is looking at me smiling from up there.

Many others who helped along the way: friends and family back at China University of Political Science and Law, at ICAO, at the United Nations, and throughout the world. Thank you for reading the draft of my thesis and offering guidance from various perspectives. I want to give a big shout-out to Ms. Christina Kiewiet de Jonge who included me into her family celebrations of Koningsdag and Sinterklaas and encouraged me to carry on with the research.

Michael Huang, my beloved husband, thank you for the love, patience, and support in every way and for keeping me on track. I cannot wait to embark on the next adventure with you! My mum Li Wang and dad Jian'en Zhang, thank you for raising me to be courageous and inspiring me to rise to challenges. But, most of all, thank you all for the endless love and 24/7 family support.

Finally, I am so grateful for having spared me on the afternoon of 24 July 2014 when I was flying to a summer school over the same area as MH17; and for the calling which keeps motivating me to demand a change.
