A Physicochemical Study of Medieval and Post-Medieval Ceramics from the Aegean

Proefschrift

ter verkrijging van
de graad van doctor aan de Universiteit Leiden
op gezag van rector magnificus prof. dr. ir. drs. H. Bijl,
volgens besluit van het college voor promoties
te verdedigen op dinsdag 9 mei 2023
klokke 10.00 uur

door

Adamantia Panagopoulou
geboren te Patras in 1985

Promotor: **Professor Dr. J.A.C. Vroom**, Faculty of Archaeology, Department of World Archaeology, Leiden University, The Netherlands.

Copromotoren: **Dr. V. Kilikoglou**, the Institute of Nanoscience and Nanotechnology, National Centre for Scientific Research ‘Demokritos’, Greece.

Dr. A. Hein, Institute of Nanoscience and Nanotechnology, National Centre for Scientific Research ‘Demokritos’, Greece.

Promotiecommissie:

Professor Dr. J.C.A. Kolen, Faculty of Archaeology, Dean, Leiden University, The Netherlands (chair).

Professor Dr. P.M.M.G. Akkermans, Faculty of Archaeology, Department of World Archaeology, Leiden University, The Netherlands (secretary).

Professor Dr. J. Buxeda i Garrigós, Department of History and Archaeology University of Barcelona, Spain.

Professor Dr. P. Petridis, National and Kapodistrian University of Athens and Director of the NKUA Museum of Archaeology and Art History, Greece.

Professor Dr. A.N. Brysbaert, Faculty of Archaeology, Faculty of Archaeology, Department of Science, Leiden University, The Netherlands.

Dr. D.J.G. Braekmans, Faculty of Archaeology, Department of Science, Leiden University, The Netherlands.

This PhD research was financially supported in part by the Scholarship of the ‘**Prins Bernhard Cultuurfonds**’, and in part by the **Institute of Nanoscience and Nanotechnology of the National Centre for Scientific Research ‘Demokritos’** in Greece.

ACKNOWLEDGMENTS

First of all, I would like to warmly thank my supervisor, **Professor Dr. J.A.C. Vroom**, who trusted me from the first moment, inspired and guided me by giving me valuable advice throughout my doctoral dissertation. I also want to thank her for the criticism and honesty and they have helped me to improve as a human and then as a scientist.

I would like to thank also **Dr. Anno Hein** for being such a great supervisor. I was really inspired by his actions. Thank him for sharing his honest feedback about the archaeometry. He was always willing to assist and advise me during my doctorate studies, but also to support me emotionally. I want to express my gratitude for everything that he has helped me achieve here. Thank you for always going above and beyond to ensure the success of my PhD. I will do my very best to exceed your expectations of my abilities.

I also would like to thank **Dr. Vasilis Kilikoglou** for giving me the opportunity to do my PhD analysis at Demokritos lab and for his contribution to provide many knowledge to a series of techniques which are involved in the study of archaeological materials. He helped me directly in my professional career as well as he gave me the opportunity to share with me many information. Thank you for supporting me some difficult periods.

Apart from my wonderful supervisors, this project would not have been possible without the financial support of the **Scholarship of the ‘Prins Bernhard Cultuurfonds’**, *‘Discovering Medieval Pottery Secrets: Techniques and Recipes of Byzantine and Ottoman Potters’*, September 2020 - February 2021. I had the opportunity to carry out some additional physicochemical analyses due to this financial support. The rest of the physicochemical analyses were financed by the **Institute of Nanoscience and Nanotechnology of the National Centre for Scientific Research ‘Demokritos’** in Greece. My deepest thanks!

Then, I would like to thank one by one the specialists in the corresponding fields, all, members of the examination committee, for their suggestions which they help me to improve the outcome of the present dissertation and in particular **Professor Dr. J.C.A. Kolen, Professor Dr. P.M.M.G. Akkermans, Professor Dr. Ann Brysbaert, Assistant Professor Dr. Dennis Braekmans, Professor Dr. Jaume Buxeda i Garrigós, Professor Dr. Platon Petridis, Professor Dr. Patrick Degryse and Dr. Michael Kerschner**.

I would like to thank the current Director of the Ephorate of Antiquities of Euboea **Dr. A. Simosi**, the previous Director **Dr. P. Kalamara** (Ephorate of Antiquities, Chalcis) and the excavator **Dr. G. Vaxevanis** for their cooperation. As well as the Director of the Ephorate of Antiquities of Lesvos **Dr. Pavlos Triandafillidis** and finally the Director of the American School of Classical Studies at Athens (ASCSA) **Professor John McK. Camp** and his team at the Athenian Agora.

I would like to thank also **Professor Hector Williams**, who is Professor Emeritus of Greek Art and Archaeology in the University of British Columbia in Vancouver, about the permission for

studying material from the Castle of Mytilene in Lesvos, GR. His contribution was very important to me, as he has already worked as excavator in Mytilene many years and his knowledge in the excavation in the Mytilene castle is thorough.

I had the chance the British School at Athens did the WDXRF analysis as well as the preparation of thin sections of petrographic analysis. Thus, I would like to thank the **Director Dr. Evangelia Kiriatzi** for her kindness and willingness to do all of them quite soon as it was possible. Also, I thank her about the access to use the facilities of the school whenever I need it. Furthermore, many thanks to **Dr. Noemi Muller**, who is Scientific Research Officer in Fitch lab, for her technical and scientific assistance.

Important and necessary, I would say, was also the contribution of the **Professor Dr. Iliopoulos Yiannis** and **Dr. Baia Xanthopoulou** and **Msc Katerina Pollatou**, geologist of the University of Patras School of Natural Sciences, Department of Geology, about their advices for the mineralogical study of my samples.

I also thank **Dr. Yannis Bassiakos**, who is Researcher Emeritus at the Institute of Nanoscience and Nanotechnology, NCSR "Demokritos", for his indirect and direct contribution to providing knowledge to a series of techniques during my Master thesis and afterwards. Also, he shared with me many information about the geological transformation in the area that I studied during my PhD.

Furthermore, I would like to mention **Dr. George Mitrikas**, who is Researcher at the Institute of Nanoscience and Nanotechnology, NCSR "Demokritos", and gave me the access to use Raman Spectroscopy whenever I need it, as well as **Dr Stefanos Chaitoglou**, who is post-doctoral researcher in the area of Nanoscience and Nanotechnology, contributed to my dissertation, educating myself in Raman Spectroscopy. Thus, I thank them for their willingness and the time that they spent providing to me valuable education.

I would like to thank also **Dr. Maniati Yianni**, who is Researcher Emeritus at the Institute of Nanoscience and Nanotechnology, NCSR "Demokritos", whose advices was quite helpful to me.

I would like to thank also **Professor Platon Petridis**, Director of the NKUA Museum of Archaeology and Art History as well as **Msc Michel Roggenbucke**, Conservator at the NKUA, about providing me the Optical Microscopy for the Petrographic analysis at the Faculty of History and Archaeology, National and Kapodistrian University of Athens.

I would like to thank also **Professor Serafeim Poulos** and **MSc Stelios Petrakis**, Department of Geography and Climatology, Faculty of Geology & Geoenvironment, National & Kapodistrian University of Athens for providing me all the geological maps and for their advices about the clay deposits in each studied area.

I would like to thank also **Dr. Eleni Aloupi** who gave me some information regarding the clay deposits in region of Attica.

I would to mention the contribution of my colleague **Dr. Georgios Mastrotheodoros**, who even though his scientific fields do not relate to the present thesis, advised me and supported me emotionally, through personal conversations.

Many thanks to **Afroditi Kamara** who offered support and linguistic advice on the English text.

Many thanks also to **Teti Palaiotheodorou, Aggeliki Mandaliou, Konstantinos Stamatoglou** and **Stamatis Manoliadis** who provided me technical support as well as **Maria Staikou** who drew the maps of the regions under study.

Dear lovely friends (**Vasiliki, Magdalini**) your incredible love helped me survive during my challenging days. I could not have made it through without you. Thank you so very much. I am eternally grateful!

Lastly, there is no bond stronger than family. Thank you for always supporting me, even when it is not easy to do my dear family (**Christos, Maria, Panagiotis, Nikos, Virginia, Alexandros, Vasiliki, Leonidas, Pinelopi**) and my lovely infants (**Panagiotis, Konstantinos, Charilaos, Maria**). Without you, I could not get through the hard times. I know I have the strength to handle anything as long as I have the love of my family behind me. You're endlessly caring and giving spirit is what guides me when times are tough. Thank you for being there!

CHAPTER 1 INTRODUCTION	15
1. INTRODUCTION	15
1.1 THE MEDIEVAL TO EARLY MODERN ASSEMBLAGES FROM CHALCIS IN EUBOEIA, ATHENS IN ATTICA AND MYTILENE IN LESVOS.	15
1.2 STATE-OF-THE-ART	16
1.3 AIM AND SCOPE OF THE THESIS	18
1.4 RESEARCH GOALS AND QUESTIONS	19
1.5 SCIENTIFIC ANALYSES	20
1.6 STRUCTURE OF THE THESIS	21
CHAPTER 2 POTTERY FINDS AND POTTERY PRODUCTION IN THE THREE STUDIED SITES	27
2. INTRODUCTION	27
2.1 A SHORT HISTORY OF THE AEGEAN DURING MEDIEVAL AND POST- MEDIEVAL TIMES.....	28
2.2 CHALCIS IN EUBOEIA IN THE MEDIEVAL AND POST-MEDIEVAL PERIODS	30
2.2.1 MEDIEVAL POTTERY IN CHALCIS IN EUBOEIA.....	31
2.3 ATHENS IN THE MEDIEVAL AND POST-MEDIEVAL PERIODS	33
2.3.1 MEDIEVAL POTTERY IN THE ATHENIAN AGORA IN ATTICA.....	33
2.3.2 POST-MEDIEVAL POTTERY IN THE ATHENIAN AGORA IN ATTICA	34
2.4 MYTILENE IN LESVOS IN THE MEDIEVAL AND POST-MEDIEVAL PERIODS	35
2.4.1 THE CASTLE OF MYTILENE IN LESVOS	36
2.4.2 MEDIEVAL POTTERY IN MYTILENE IN LESVOS	37
2.4.3 POST-MEDIEVAL POTTERY IN THE CASTLE OF MYTILENE IN LESVOS.....	37
2.5 TYPES OF KILNS IN THE MEDIEVAL AND POST-MEDIEVAL PERIODS	38
2.5.1 POTTERY KILNS IN ATHENS	40
2.5.2 POTTERY KILNS IN MYTILENE IN LESVOS	41
CHAPTER 3 STATISTIC OF THE SAMPLED PIECES FROM THE THREE STUDIED SITES	59
3. INTRODUCTION	59
3.1 LOCAL POTTERY	59

3.2 IMPORTED POTTERY	62
3.3 DECORATION AND ICONOGRAPHY	64
CHAPTER 4 A SHORT OVERVIEW OF ETHNOGRAPHICAL RESEARCH IN THE THREE STUDIED AREAS	81
4. INTRODUCTION	81
4.1. THE MODERN POTTERY OF EUBOEA	82
4.2. THE MODERN POTTERY OF ATTICA	83
4.3 THE MODERN POTTERY OF LESVOS	84
CHAPTER 5 TYPOLOGY OF THE SAMPLED PIECES	99
5. INTRODUCTION	99
5.1 A) WHITE WARES	101
5.1.1 A.I) GLAZED WHITE WARE II/IV	101
5.1.2 A.II) POLYCHROME WHITE WARE	101
5.1.3 A.III, A.IV) GLAZED FRIT WARE AND FRIT WARE	102
5.1.4 A.V) LUSTRE WARE	102
5.1.5 A.VI) MAIOLICA	103
5.1.6 A.VII) PORCELAIN	103
5.1.7 A.VIII) IZNIK WARE	103
5.1.8 A.IX) KÜTAHYA WARE	104
5.2 B) RED WARES	105
5.2.1 B.I) PLAIN GLAZED WARE IN A RED AND GREY FABRIC	105
5.2.2 B.II) UNGLAZED PLAIN WARE (LU)	105
5.2.3 B.III) AMPHORAE	106
5.2.4 B.IV) SLIP-PAINTED WARE	106
5.2.5 B.V) GREEN AND BROWN PAINTED WARE	107
5.2.6 B.VI) FINE SGRAFFITO WARE	107
5.2.7 B.VII) PAINTED FINE SGRAFFITO WARE	107
5.2.8 B.VIII) INCISED SGRAFFITO WARE	108
5.2.9 B.IX) CHAMPLEVÉ WARE	108
5.2.10 B.X) MONOCHROME GLAZED WARE	108
5.2.11 B.XI) SPLASHED WARE	109
5.2.12 B.XII) ZEUXIPPUS WARE	109
5.2.13 B.XIII) ZEUXIPPUS WARE SUBTYPES	110

5.2.14 B.XIV) MONOCHROME AND ONE COLOUR SGRAFFITO WARE	110
5.2.15 B.XV) ELABORATE INCISED WARE	110
5.2.16 B.XVI) ROULETTE/VENETO WARE.....	111
5.2.17 B.XVII) MONOCHROME SGRAFFITO WARE	111
5.2.18 B.XVIII) POLYCHROME (BROWN AND GREEN) SGRAFFITO WARE	111
5.2.19 B.XIX) MILETUS WARE.....	112
5.2.20 B.XX) PAINTED WARE	112
5.2.21 B.XXI) POLYCHROME PAINTED MAIOLICA WARE	113
5.2.22 B.XXII) POLYCHROME MARBLED WARE	113
5.2.23 B.XXIII) SPANISH LUSTRE WARE	114
5.2.24 B.XXIV) DIDYMOTEICHO WARE	114
CHAPTER 6 GLAZES, PIGMENTS AND CLAY VITRIFICATION IN GENERAL..	123
6. INTRODUCTION	123
6.1 HISTORY OF THE GLAZE TECHNOLOGY	123
6.2 GLASSES AND GLAZES.....	125
6.2.1 RAW GLAZES	127
6.2.2 FRITTED GLAZES.....	127
6.3 DECORATION TECHNIQUES OF POTTERY	128
6.3.1. SLIPS AND UNDERGLAZE DECORATION.....	128
6.3.2. COLOURANTS, PIGMENTS AND OPACIFIERS	128
6.3.3. OVERGLAZE DECORATION, ENAMELS, GILDING AND LUSTER.....	130
6.4 FIRING OF THE GLAZES	131
6.5 THE FLUX K VS NA	131
6.6 LEAD AND FLUX.....	132
6.6.1 LEAD AND OPACIFIERS	133
6.6.2 LEAD AND BRILLIANCE	133
6.7 CLAY AND TEMPERATURE	134
6.8 VITRIFICATION	135
6.8.1 BLOATING.....	137
6.8.2 COLOURS OF BODY AND PAINT IN OXIDIZING CONDITIONS	137

CHAPTER 7 X-RAY FLUORESCENCE SPECTROSCOPY	147
7. INTRODUCTION.....	147
7.1 X-RAY FLUORESCENCE SPECTROSCOPY (pXRF, WDXRF).....	148
7.2 RESULTS AND DISCUSSION OF pXRF	150
7.2.1 PIGMENTS	150
7.2.2 CERAMIC FABRIC	152
7.3 RESULTS AND DISCUSSION OF WDXRF	155
7.3.1 ATHENIAN AGORA IN ATTICA AND CHALCIS IN EUBOEAE.....	155
7.3.2 THE CASTLE OF MYTILENE IN LESVOS	157
CHAPTER 8 OPTICAL MICROSCOPY – CERAMIC PETROGRAPHY	187
8. INTRODUCTION.....	187
8.1 ELEMENTS ON THE GEOLOGICAL SETTING OF ATTICA, IN GREECE	188
8.2 ELEMENTS ON THE GEOLOGICAL SETTING OF CENTRAL EUBOEAE (LILAS RIVER PLAIN), IN GREECE	190
8.3 ELEMENTS ON THE GEOLOGICAL SETTING OF EASTERN LESVOS ISLAND, IN GREECE	192
8.4 OPTICAL MICROSCOPY – CERAMIC PETROGRAPHY.....	194
8.5 RESULTS AND DISCUSSION OF THE PETROGRAPHIC ANALYSIS	197
CHAPTER 9 X-RAY POWDER DIFFRACTION.....	235
9. INTRODUCTION.....	235
9.1 X-RAY POWDER DIFFRACTOMETRY (XPRD)	235
9.2 RESULTS AND DISCUSSION OF XPRD.....	237
CHAPTER 10 SCANNING ELECTRON MICROSCOPY	267
10. INTRODUCTION.....	267
10.1 SCANNING ELECTRON MICROSCOPY (SEM-EDS).....	268
10.2 RESULTS AND DISCUSSION OF SEM	269
10.2.1 PIGMENTS OF THE SAMPLED PIECES FROM CHALCIS IN EUBOEAE.....	269
10.2.2 PIGMENTS OF THE SAMPLED PIECES FROM THE ATHENIAN AGORA IN ATTICA.....	269
10.2.3 PIGMENTS OF THE SAMPLED PIECES FROM THE CASTLE OF MYTILENE IN LESVOS	270
10.2.4 GLAZES OF THE SAMPLED PIECES FROM CHALCIS IN EUBOEAE.....	271

10.2.5 GLAZES OF THE SAMPLED PIECES FROM THE ATHENIAN AGORA IN ATTICA.....	272
10.2.6 GLAZES OF THE SAMPLED PIECES FROM THE CASTLE OF MYTILENE IN LESVOS.....	273
10.2.7 SLIP LAYERS OF THE SAMPLED PIECES FROM CHALCIS IN EUBOEIA, THE ATHENIAN AGORA IN ATTICA AND THE CASTLE OF MYTILENE IN LESVOS.....	275
10.2.8 CERAMIC FABRICS OF THE SAMPLED PIECES FROM CHALCIS IN EUBOEIA, THE ATHENIAN AGORA IN ATTICA AND THE CASTLE OF MYTILENE IN LESVOS.....	276
