Different roads lead to venous thrombosis after lower-leg injury and knee arthroscopy

Mechanistic insights in the development of venous thrombosis

Proefschrift

ter verkrijging van
de graad van doctor aan de Universiteit Leiden,
op gezag van rector magnificus prof.dr.ir. H. Bijl,
volgens besluit van het college voor promoties
te verdedigen op woensdag 14 juni 2023
klokke 16.15 uur

door

Caroline Eveline Touw
geboren te Rotterdam
in 1991

Promotores

Prof. Dr. S.C. Cannegieter

Prof. Dr. R.G.H.H. Nelissen

Co-promotor

Dr. B. Németh

Leden promotiecommissie

Prof. Dr. H.H. Versteeg

Prof. Dr. A.B. Pedersen (Aarhus University, Aarhus, Denmark)

Dr. F. Ní Ainle (Mater Misericordiae University Hospital, Dublin, Ireland)

Dr. H.B. Ettema (Isala Ziekenhuis, Zwolle, Nederland)

TABLE OF CONTENTS

Chapter 1	General introduction & thesis outline	7
Part I – Impact of lower-leg injury and knee arthroscopy on the coagulation system		
Chapter 2	Lower-leg injury and knee arthroscopy have distinct effects on coagulation	21
Chapter 3	Effect of lower-leg trauma and knee arthroscopy on procoagulant phospholipid-dependent activity	59
Chapter 4	Enhanced in vivo and ex vivo thrombin generation after lower-leg trauma, but not after knee arthroscopy	77
Chapter 5	The influence of lower-leg injury and knee arthroscopy on natural anticoagulants and fibrinolysis	97
Chapter 6	The influence of thigh-tourniquet application during knee arthroscopy on haemostasis and inflammation	123
Part II – Association between changes in haemostasis and development of VTE		
Chapter 7	Haemostatic profiles related to increased risk of venous thromboembolism in patients with lower-leg injury	163
Chapter 8	Targeted proteomics for evaluating risk of venous thrombosis following traumatic lower-leg injury or knee arthroscopy	199
Chapter 9	Summary & general discussion	231
Chapter 10	Nederlandse samenvatting	247
Appendices		
	List of publications	261
	PhD portfolio	263
	Dankwoord	266
	Curriculum vitae	269
