STELLINGEN

Behorend bij het proefschrift:

'DATA DRIVEN IMPROVEMENT OF HIP FRACTURE CARE'

1. A hospital's annual hip fracture patient volume does not directly determine the quality of the hip fracture care provided by that hospital – this thesis
2. Guideline adherence in hip fracture implant choice deserves more attention – this thesis
3. When making hospital comparisons on the quality of hip fracture care, case-mix correction is a requisite – this thesis
4. New variables for a quality-of-care registry should only be implemented after a structural assessment of their potential – this thesis
5. The Dutch Hip Fracture Audit needs more outcome data and outcome data of better quality whilst at the same time the burden of registration should be reduced – this thesis
6. Quality of care is not an objective fact – Inaugural lecture Prof. dr. M.W.J.M Wouters 2022
7. Treatment guidelines do not provide enough advice on the nonoperative treatment of frail patients with limited life expectancy – Loggers et al. JAMA 2022
8. The progress made in hip fracture audits contributes to addressing the global challenge of the osteoporosis pandemic; their value is underestimated – Currie. Injury 2018
9. Hip fracture registries should make their collected and presented data more uniform, making international comparisons more feasible – Werner et al. EJTES 2022
10. A smooth sea never made a skilled sailor – Franklin D Roosevelt
Zonder uitdagingen geen zelfontwikkeling
11. There is only one way to happiness and that is to cease worrying about things that are beyond the power of our will – Epictetus
Maak je alleen zorgen over dat waar je invloed op hebt, Hakuna Matata.
