Table of contents

Chapter 1	General introduction and outline of this thesis	7
	<i>Part I: (patho)physiology and mechanisms</i>	
Chapter 2	Asymmetry and heterogeneity: part and parcel in cardiac autonomic innervation and function	23
Chapter 3	Association between reduced heart rate variability components and supraventricular tachyarrhythmias in patients with a systemic right ventricle	57
Chapter 4	QT interval variability and heart rate turbulence are associated with clinical characteristics in congenital heart disease patients with a systemic right ventricle	79
	<i>Part II: clinical applications</i>	
Chapter 5	Validation and feasibility of echocardiographic assessment of systemic right ventricular function: serial correlation with MRI	103
Chapter 6	Clinical course long after atrial switch: A novel risk score for major clinical events	127
Chapter 7	Sacubitril/valsartan in the treatment of systemic right ventricular failure	147
Chapter 8	Potential of eHealth smart technology in optimization and monitoring of heart failure treatment in adults with systemic right ventricular failure	165
Chapter 9	Ventricular assist device implantation in patients with a failing systemic right ventricle: a call to expand current practice	187
Chapter 10	Summary, conclusions, and future perspectives	197
	Samenvatting, conclusies, en toekomstperspectieven	203
	List of publications	209
	Dankwoord	211
	Curriculum Vitae	213
