## Table of contents

<b>Chapter 1</b>	General introduction and outline of this thesis	7
	<i>Part I: (patho)physiology and mechanisms</i>	
<b>Chapter 2</b>	Asymmetry and heterogeneity: part and parcel in cardiac autonomic innervation and function	23
<b>Chapter 3</b>	Association between reduced heart rate variability components and supraventricular tachyarrhythmias in patients with a systemic right ventricle	57
<b>Chapter 4</b>	QT interval variability and heart rate turbulence are associated with clinical characteristics in congenital heart disease patients with a systemic right ventricle	79
	<i>Part II: clinical applications</i>	
<b>Chapter 5</b>	Validation and feasibility of echocardiographic assessment of systemic right ventricular function: serial correlation with MRI	103
<b>Chapter 6</b>	Clinical course long after atrial switch: A novel risk score for major clinical events	127
<b>Chapter 7</b>	Sacubitril/valsartan in the treatment of systemic right ventricular failure	147
<b>Chapter 8</b>	Potential of eHealth smart technology in optimization and monitoring of heart failure treatment in adults with systemic right ventricular failure	165
<b>Chapter 9</b>	Ventricular assist device implantation in patients with a failing systemic right ventricle: a call to expand current practice	187
<b>Chapter 10</b>	Summary, conclusions, and future perspectives	197
	Samenvatting, conclusies, en toekomstperspectieven	203
	List of publications	209
	Dankwoord	211
	Curriculum Vitae	213
