Prosthetic joint infections

New diagnostic and therapeutic strategies

Proefschrift

ter verkrijging van
de graad van doctor aan de Universiteit Leiden,
op gezag van de rector magnificus prof. dr. ir. H. Bijl,
volgens besluit van het college voor promoties
te verdedigen op dinsdag 27 juni 2023
klokke 16:15 uur

door

Hendrik Scheper
geboren te Oostflakkee
in 1980

Promotores

Prof. dr. L.G. Visser

Prof. dr. M.G.J. de Boer

Promotiecommissie

Dr. A. Soriano (University of Barcelona)

Prof. dr. F.R. Rosendaal

Prof. dr. R.W. Poolman

Dr. M. Wouthuyzen-Bakker (University Medical Center Groningen)

Table of contents

Chapter 1. Introduction and outline of thesis	7
Part I. The use of E-health to detect prosthetic joint infections	
Chapter 2. A mobile app for postoperative wound care after arthroplasty: perceived usefulness and ease of use	35
Chapter 3. Association between postoperative wound leakage and prosthetic joint infection after arthroplasty: a multicenter observational cohort study	53
Part II. Evaluation of current antimicrobial strategies for PJI	
Chapter 4. Outcome of debridement, antibiotics and implant retention for staphylococcal hip and knee prosthetic joint infections, focused on rifampicin use: a systematic review and meta-analysis	75
4a. Rifampicin for staphylococcal PJI: do we still need a RCT?	103
4b. Reported association between duration of rifampicin and improved outcomes in acute staphylococcal prosthetic joint infection: analysis hampered by methodological errors	109
Chapter 5. Infected tumor prostheses of the lower extremities: causative microorganisms, effectiveness of DAIR and risk factors for treatment failure	113
Part III. New antimicrobial strategies for PJI	
Chapter 6. Comparable effectivity of different antibiotic strategies for staphylococcal PJI: results from a large prospective quality registry	133
6a. Treatment of prosthetic joint infection: debridement, implant retention and antimicrobial treatment with short duration of rifampicin	157
Chapter 7. SAAP-148 eradicates MRSA persisters within mature biofilm models simulating prosthetic joint infection	163
Chapter 8. Summary and general discussion	181
Nederlandse samenvatting	195
Nawoord	205
List of publications	209
List of participating centers	215
Curriculum vitae	219
