TOPOLOGICAL DECODING OF
BIOMOLECULAR FOLD COMPLEXITY

Proefschrift

ter verkrijging van
de graad van doctor aan de Universiteit Leiden,
op gezag van rector magnificus prof.dr.ir. H. Bijl,
volgens besluit van het college voor promoties
te verdedigen op woensdag 5 juli 2023
klokke 11:15 uur

door

Barbara Scalvini
geboren te Chiari
in 1992

Promotor:
Prof. dr. H. Irth

Co-promotor:
Dr. A. Mashaghi

Promotiecommissie:
Prof. dr. H. Schiessel (Technical University of Dresden)
Prof. dr. M. Vendruscolo (University of Cambridge)
Prof. dr. I. Nemenman (Emory University)
Dr. L.M.M. Jawerth
Prof. dr. M. van Eck
Prof. dr. J.A. Bouwstra

The research described in this thesis was performed at the Division of Systems Pharmacology and Pharmacy (SPP) of the Leiden Academic Centre for Drug Research (LACDR), Leiden University (Leiden, The Netherlands). The research was financially supported by Muscular Dystrophy Association (USA), Dutch Research Council (NWO), and the Mashaghi lab start-up package (Leiden University).

*“In the slip of a bolt, there’s a tiny revolt,
The seed of a war in a creak of a floorboard.
A storm can begin with a flap of a wing.
The tiniest mite packs the mightiest sting.”*

- Matilda: The Musical

TABLE OF CONTENT

CHAPTER 1	9
Topology of folded molecular chains: from single biomolecules to engineered origami	
CHAPTER 2	35
Topological principles of protein folding	
CHAPTER 3	83
Circuit topology approach for the comparative analysis of intrinsically disordered proteins	
CHAPTER 4	131
Topological sensing of the cytosolic molecular machinery with optical tweezers	
CHAPTER 5	153
Circuit topology analysis of cellular genome reveals signature motifs, conformational heterogeneity and scaling	
CHAPTER 6	203
Beyond biopolymers: the circuit topology of semantic similarity highlights statistical differences in the communication style of true and fake news	
CHAPTER 7	217
Conclusion and outlook	
ADDENDUM	227
Summary	228
Samenvatting	231
Acknowledgements	234
Curriculum vitae	236
List of publications	237
