DANKWOORD

The studies presented in this thesis were written at the Leiden University Medical Center Department of Cardiology. There are many people at the LUMC who have contributed to my growth as a scientific researcher, culminating in the works displayed in this thesis.

Firstly, Jeroen, I would like to thank you for offering me a place to study and learn at your world class cardiac imaging research laboratory. Thank you for supporting my ideas, helping to refine them and for sharing your wisdom and advice about life in general.

Victoria, I cannot overstate how important your guidance was and still is for me. I really appreciate all the time you took teaching me to write, to perform statistical analyses, to generate my own ideas and to think critically about science. I could not have done this without you.

Nina, thank you for guiding me through many projects, and for all of the opportunities you presented to me to work in interesting research areas of Cardiology. Thank you also for all of your efforts helping me to finalize this thesis.

Federico, I was very fortunate to have attended the LUMC at the same moment as you and to begin our PhD at the same time. You were an invaluable guide to my perception and practice of cardiac imaging, research and statistics. We had some great times and I hope that we will be able to travel through more of the world together at another time.

I would also like to thank my other good friends and research colleagues in the LUMC imaging department: Rodolfo, Stephan, Idit, Xu, Kensuke, Catherina, Chiara, Jan, Xavier, Jurien, Gurpreet, Inge, Aniek, Marlieke, Farnaz, Mai, Mo, Jose, Surenjav, Anna, Takeru, Rinchenkhand, Alexander, Philippe. It was a privilege and a pleasure working with you all, I learnt a great deal from each one of you.

Mum and Dad, thank you for all of your support and encouragement of my academic pursuits throughout my life and while I was in Leiden - despite the physical divide due to the pandemic.

Chase, Evelyn and Maxwell, my loving children, thank you for your patience and understanding while I undertook and completed this work.

To my wife Sarah, thank you for your unwavering support and love. Thank you for listening to all of my theorizing and brainstorming of research ideas. Thank you for travelling across the world with our children, staying steadfast despite the isolation due to the pandemic, and sacrificing so much to allow me to pursue my dreams. Anything I have achieved, I could not have done it without you.

CURRICULUM VITAE

Steele Butcher was born on September 8, 1989, in Perth, Western Australia. He graduated from high school in Perth in 2006, before beginning a Bachelor of Science at Murdoch University. He completed his Bachelor of Science in 2009, and subsequently completed a Bachelor of Chiropractic in 2011, also at Murdoch University. Following working for several years as a Chiropractor in private practice, he returned to study Medicine at the University of Notre Dame Australia in 2014. He won the Australian Medical Association prize for highest achieving student in Year 1, 2, 3 and 4 of his medical degree, achieving a high distinction and 4.0/4.0 GPA in each year, and the Australian Medical Association DUX prize, in addition to many other individual awards. He graduated with an MD degree in 2017. In his final year of medical school training, he began studying a Master of Philosophy at the University of Notre Dame Australia, with his thesis focusing on the role of Computed Tomography Coronary Angiography for the risk assessment of acute coronary syndrome patients. He graduated from the Master of Philosophy degree in 2021, achieving a 4.0/4.0 GPA in degree units. He completed his internship at Royal Perth Hospital in 2018 and the first year of his Basic Physician Training at Royal Perth Hospital in 2019, before beginning his PhD late in 2019 at Leiden University Medical Centre under the guidance of Prof. Dr. J.J. Bax, Dr. V. Delgado and Dr. N. Ajmone Marsan. During his time at Leiden University Medical Center, Steele focused his research on novel methods of evaluating right ventricular function, valvular heart disease, and cardiac involvement in systemic sclerosis.

FINANCIAL SUPPORT

Dr. Steele C. Butcher received funding from the European Society of Cardiology (ESC Research Grant App000080404) during a period of time undertaking this research.
