PATHOPHYSIOLOGY OF VON WILLEBRAND FACTOR IN BLEEDING AND THROMBOSIS

Maria Teresa Pagliari

Pathophysiology of von Willebrand factor in bleeding and thrombosis

The research described in this thesis was partially supported by the medical research profile 'Vascular and Regenerative Medicine' grant from the Leiden University Medical Center.

Author: Maria Teresa Pagliari

PATHOPHYSIOLOGY OF VON WILLEBRAND FACTOR IN BLEEDING AND THROMBOSIS

Proefschrift

ter verkrijging van
de graad van doctor aan de Universiteit Leiden,
op gezag van rector magnificus prof.dr.ir. H. Bijl,
volgens besluit van het college voor promoties
te verdedigen op woensdag 20 september 2023
klokke 10.00 uur

door

Maria Teresa Pagliari
geboren te Crema, Italië
in 1986

PROMOTORES

Prof. Dr. H.C.J. Eikenboom

Prof. Dr. F.R. Rosendaal

LEDEN PROMOTIECOMMISSIE

Prof. Dr. J.G. van der Bom

Prof. Dr. F. Peyvandi Università degli Studi di Milano

Prof. Dr. F.W.G. Leebeek Erasmus Universiteit Rotterdam

Prof. Dr. J.J. Voorberg Universiteit van Amsterdam

TABLE OF CONTENTS

Chapter 1	Introduction and outline of the thesis	7
PART I	GENETICS OF VON WILLEBRAND DISEASE	17
Chapter 2	Differential diagnosis between type 2A and 2B von Willebrand disease in a child with a previously undescribed <i>de novo</i> mutation	19
Chapter 3	von Willebrand disease type 1 mutation p.Arg1379Cys and the variant p.Ala1377Val synergistically determine a 2M phenotype in four Italian patients	29
Chapter 4	The dominant p.Thr274Pro mutation in the von Willebrand factor propeptide causes the von Willebrand disease type 1 phenotype in two unrelated patients	47
PART II	TYPE 3 VON WILLEBRAND DISEASE: RESULTS FROM THE 3WINTERS-IPS	67
Chapter 5	von Willebrand factor propeptide and pathophysiological mechanisms in European and Iranian patients with type 3 von Willebrand disease enrolled in the 3WINTERS-IPS study	69
Chapter 6	von Willebrand factor neutralizing and non-neutralizing alloantibodies in 213 subjects with type 3 von Willebrand disease enrolled in 3WINTERS-IPS	87
PART III	ROLE OF VON WILLEBRAND FACTOR IN DEEP VEIN THROMBOSIS	111
Chapter 7	ADAMTS13 activity, high VWF and FVIII levels in the pathogenesis of deep vein thrombosis	113
Chapter 8	Role of ADAMTS13, VWF and F8 genes in deep vein thrombosis	127
Chapter 9	General Discussion and Perspectives	145
Chapter 10	English summary	163
	Samenvatting	169
	Sommario	173
Appendix	Acknowledgments	177
	Curriculum vitae	180
	Publication List	181
	PhD Portfolio	184
